## REVIEW OF 2015 FORD RANGER PX WORKSHOP

- This is definitely one of my all-time favorite books for its raw and uncensored examination of the world's problems. It is a great source for recognizing our collective problems. I just could not put this book down! This book deserves 4 to 5 stars based on problem recognition. It would be in our best interest to acknowledge these realities, instead of simply "silencing" them. Otherwise, everything wonderful that we've worked so hard for will just all go down the drain. Guaranteed, the world will go on, perhaps with another ice age. As for humans, we may or we may not. As evolution has demonstrated time and time again, life will survive. The question is, will many of us survive through it. What this book does not offer are solutions. Maybe that wasn't Jensen's purpose for this book. He basically says that there are no solutions and that we're all[in trouble]. It's possible that he was simply using a "double bind" or "reverse psychology" approach to get readers to take action. In looking at the big picture of getting

things done, this book gets 2 stars and it is up to us to fulfill the other 3 stars. Earning 5 stars is a combined effort between Jensen and ourselves. It would be impossible for a single author to offer a manual for action in solving the problems we recognize. There are so many disciplines to cover. What is needed is a combined effort from all sectors of civilization. I do believe that it can be done. In fact, it's currently taking place, even though it is difficult to tell because we do not see any drastic results in our everyday lives. Only time will tell. The important thing is that we get as many people to join in the effort as we can. It would be impossible to get everybody to do it, which is fine. The crucial part is getting THE RIGHT PEOPLE to join the effort in sustaining everything we've worked for. I highly recommend this book. It does what it's suppose to do. I have faith that you will create possible solutions based on your own expertise and experiences.

- I found this book through Daniel Quinn's book list, and I didn't waste much time in reading it. Although maybe more radical than Quinn and less science based than Richard Dawkins, the emotional cry of this book cannot be denied. Sheer rage, love and honesty that scream out of these pages is so overwhelming you'll have to be hard pressed to put the book down, or like my mother, to read it at all. I was pretty sensitive as a child and I had to make "walls" and "barriers" in my mind to avoid being physically overrun by our culture. So my idol became (except my mom and dad) the coolest and coldest character ever - Mr. Spock. Logic with no feelings. To the max. In doing so, I became the prime mental example of our culture, yelling "I want more and I want it now" although not really believing it. This book is for everyone who suspects there is something more than industrial consumerism that eats away our very planet. I don't agree with all opinions in this book (especially about Richard Dawkins' work), but I began to have conversations with animals and plants. Insane? Maybe, but they said the same for those who said the Earth wasn't flat... This is no easy read! But it is, after all, a very rewarding one.
