REVIEW OF CURRENT TRENDS IN EYE TRACKING RESEARCH

- I really enjoyed this book! I couldn't put it down after the first page which compares Marshall, "An average North American Male" ... "plump and balding", to his caged pet bird - "Both had lived three fourths of their expected life span and had another fourth of life to go, if they were lucky". This sets the tone for the novel which is a thought provoking story written with wit and intelligence. I should note, however, this is not and it is a book about the character Marshall Hollenzer. It is really a book about people - the choices they make and/or the fate bestowed upon them - and journeys - both physical and spiritual. This novel is thought provoking, entertaining, and enlightening. I recommend buying at least two copies - this is the type of book that you will want to share with people you know.

- I used to read Belva Plain quite a bit; it's been a while...but I found this on my shelf. It was an ok read. Probably about as good as what her other books were, but I was in high school/college when I was reading them and tastes change. The premise was pretty interesting, but after a while Hyacinth, who is hiding a secret I won't spoil- starts to get on your nerves. Towards the end you're ready to yell at the novel to just get on with it!! I think the other thing that gave me mixed feelings with this book was that I really just didn't understand Hyacinth as a mother...I won't bore you with it, but I just didn't "buy" her as a loving mother. If you like Plain you might enjoy this book...other than that I really can't recommend it to anyone.
