This straightforwardly written and highly informative book is designed as an introductory history and guide to Japanese prints for the student and the beginning collector. Not limited to "ukiyo-e", it also discusses medieval Buddhist prints and the prints of the modern era, from the Meiji period to the present. Thus such modern luminaries as Onchi, Hiratsuka, and Munakata are presented alongside the Edo master printmakers Harunobu, Kiyonaga, Utamaro, Sharaku, Hokusai, and Hiroshige. A major virtue of the book is the attention it gives to the aesthetics of the prints and to the lives of the printmakers themselves. Illustrated with 14 prints in full color and 86 in black and white, it also offers a thoroughly useful chapter on the collection and care of Japanese prints, a glossary, and a valuable selected bibliography. -- From publisher's description.

[The Complete Field Guide to Stick and Leaf Insects of Australia](#) John Wiley & Sons

Australia has a rich diversity of phasmids--otherwise known as stick and leaf insects. Most of them are endemic, few have been studied and new species continue to be found. Stick insects are, by far, Australia's longest insects--some of them reach up to 300 mm in body length and more than 500 mm including outstretched legs. Many stick insects are very colorful and some have quite elaborate, defensive behavior. Increasingly they are being kept as pets. This is the first book on Australian phasmids for nearly 200 years. It includes photographs and distribution maps for all species, notes on their ecology and biology as well as identification keys suitable for novices or professionals.

Pathwise estimation and inference for diffusion market models discusses contemporary techniques for inferring, from options and bond prices, the market participants' aggregate view on important financial parameters such as implied volatility, discount rate, future interest rate, and their

uncertainty thereof. The focus is on the pathwise inference methods that are applicable to a sole path of the observed prices and do not require the observation of an ensemble of such paths. This book is pitched at the level of senior undergraduate students undertaking research at honors year, and postgraduate candidates undertaking Master's or PhD degree by research. From a research perspective, this book reaches out to academic researchers from backgrounds as diverse as mathematics and probability, econometrics and statistics, and computational mathematics and optimization whose interest lie in analysis and modelling of financial market data from a multi-disciplinary approach. Additionally, this book is also aimed at financial market practitioners participating in capital market facing businesses who seek to keep abreast with and draw inspiration from novel approaches in market data analysis. The first two chapters of the book contains introductory material on stochastic analysis and the classical diffusion stock market models. The remaining chapters discuss more special stock and bond market models and special methods of pathwise inference for market parameter for different models. The final chapter describes applications of numerical methods of inference of bond market parameters to forecasting of short rate. Nikolai Dokuchaev is an associate professor in Mathematics and Statistics at Curtin University. His research interests include mathematical and statistical finance, stochastic analysis, PDEs, control, and signal processing. Lin Yee Hin is a practitioner in the capital market facing industry. His research interests include econometrics, non-parametric regression, and scientific computing.

REVIEW OF KONICA MINOLTA SCANNING SETUP GUIDE

- Robin D. Stone, a former executive with Essence Magazine, Boston Globe and New York Times has covered every possible aspect and cause of sexual abuse in her newly released book, "No Secrets, No Lies - How Black Families Can Heal from Sexual Abuse." She accurately discusses the reasons and terrifying consequences that are plaguing numerous African-American families that have suffered from sexual assault. The powerful resource guide seeks to assist families to thoroughly understand, prevent and overcome the devastating impact of sexual abuse on adult survivors. Ms. Stone, an abuse survivor herself, realistically has written a one of a kind book that addresses the physical, emotional and psychological scarring and horrific effects of sexual abuse within the dysfunctional family. Through a collection of powerful and deep personal interviews with abuse victims, abusers and additional family members, "No secrets, No Lies" speaks out to survivors, parents, caregivers, family members and friends designating and furnishing detailed and practical steps for imperative healing. The book is divided into three distinct parts. It covers immensely important material on the background and "WHYS" of child sexual abuse, interviews with more than thirty survivors and then easy to follow guidelines by professional experts who work with and treat the survivor and the abuser. Included also are compelling advice, poignant anecdotes, as well as contact information for legal help, therapists and advocacy groups throughout the USA. It provides invaluable insight necessary for overcoming and understanding the horrific, overwhelming experiences and effects for recovery and resolution. This book is an eye opener that sexual abuse is wide spread, vastly occurring and must be recognized. The sexual abuser must be reported to the proper authorities, regardless of who it is because this is a criminal offense. The offense should be dealt with, the abuser charged and the acts eradicated for the sake of the innocent victim, the child. No longer should this evil atrocity be kept silent.
