This book is about the fundamentals of live sound engineering and is intended to supplement the curriculum for the online classes at the Production Institute (www.productioninstitute.com/students). Nonetheless, it will be invaluable for beginning sound engineers and technicians anywhere who seek to expand their knowledge of sound reinforcement on their own. Written with beginners and novices in churches and convention centers in mind, this book starts by teaching you professional terminology and the processes of creating production related documents used to communicate with other sound engineers, vendors and venues. Subjects such as Signal Path and AC (alternating current) power safety and distribution are closely examined. These two subjects are closely related to the buzzing, humming and other noise related phenomena that often plague sound reinforcement systems. Chapters include an in-depth review of both analog and digital mixing consoles, their differences and similarities, and the gain structure fundamentals associated with the proper operation of either type of mixing console. Audio dynamic processors such as compressors, limiters and noise gates and their operation are explained in detail. Audio effects like delay and reverb are examined so that you can learn the basics of "sweetening" the mix to create larger and more emotive soundscapes and achieve studio-like outcomes in a live sound environment. Advanced mixing techniques, workflow, and the conventional wisdom used by professional audio engineers are explained so you don't have to spend years trying to figure out how these processes are achieved. Last but not least, a comprehensive review of acoustic feedback, and how to eliminate it from stage monitors and main speaker systems are detailed in a step by step process. This book will be especially helpful to volunteer audio techs in houses of worship, convention centers and venues of all types. It will bridge the gap between the on-the-job training that beginners receive and the knowledge and conventional wisdom that professional sound engineers employ in their daily routine.

- Egypt's Naguib Mahfouz was the great chronicler of Cairo's dark alleyways and murky souls. Born in 1911, he was educated in philosophy at the University of Cairo and spent most of his life as a civil servant . While he seldom travelled abroad, he was strongly influenced by the likes of men like Proust, Balzac, Dickens, and Camus. He won the Nobel Prize in 1988."The Time and the Place and Other Stories" is a great place to begin if you've never read anything by Mahfouz and a welcome slice of his short fiction if you're only familiar with his novels. One is struck by the variety of the stories collected here. Written between 1962 and 1989, they incapsulate Mahfouz's concern with everything from political injustice to the downfall of families to loneliness and death and the anguished world-weariness that merges gradually, in many characters, into mysticism.The Borgesean "The Man and the Other Man" (even the title is Borgesean) is a dark political allegory about a murderer stalking his victim; at the end, though, he finds himself woven into a labyrinthine nightmare of his own creation. In contrast to this tale's surrealism, "The Answer is No" is a realistic, outspokenly "feminist" tale about a resolute young woman who scorns the advances of an old tutor of hers and seeks to avoid love in order to devote her life to teaching, "persuading herself that happiness is not confined to love and motherhood. Never has she regretted her firm decision." Side by side with these are stories like the title-piece, a semi-fantastic tale about a man who digs up an ancient parchment in his garden which leads him, in a bizarre (but, in retrospect, hilarious) ending, into trouble with the law, and "The Empty Café", about an old teacher "cursed by a long life" who has seen all his friends and now his wife die and is left, at last, alone, shipwrecked at the end of his days in an age that is not his. Alongside these are the folktales "The Conjurer Made Off With the Dish" and the mystical "Zaabalawi", Mahfouz's most famous story, about a man hunting for an elusive healer-sheikh.I thought a few of the stories were a flop (for instance, "The Tavern of the Black Cat", in which a man walks into a café and, for no reason I could catch, refuses to let anyone leave; the jumbled up ending left me with the impression that Mahfouz just couldn't pull it off.) Otherwise, there's no reason why this book should be out of print. It's worth finding. 5 stars.
