REVIEW OF COMBUSTION TURNS SOLUTION MANUAL

- Jonas lives in the 'Community', a supposedly utopian world where everything is flawless. There are no good or bad, there is no hunger, no war, and no pain - a perfect world to live in. Jonas lived 12 years of his life without questioning the system and accepting things as they were. But when he is selected as the 'Receiver of Memories' he starts to discover secrets which lie beneath the perfect exterior of his world which he rather would not have known. As he receives more and more memories his wish to explore the world beyond his Community increases. A compelling tale showing the courage needed to go against a set system to bring a change. The characters are perfectly described and none of the characters are bland. Most of the characters are accepting of the system of the 'Community' and do not want to change it or are rather scared to go against the system. The main character of the book Jonas on the other hand is unsatisfied with the way things are and wants to see it change. Sometime before he becomes twelve he notices certain changes in his surroundings which he can't explain. When he becomes the Receiver of Memories he starts to understand the change he had experienced, change he which had made him feel free and not bound by rules. His longing to explore

the world beyond grows stronger with each new memory he gets even though he knows it's illegal. My favourite character from the book would be the Giver who gives the memories to Jonas. Sad and melancholy in nature, he is the only one who understands Jonas' longing for freedom and even decides to help him escape. The book is a complete page turner and raises issues which force the readers to ponder upon. What if the world was perfect, a world where everything was same and without any conflict? Would we still long for the imperfect world? For the people living in Jonas' world the world they live would be a utopia but for the reader it is a dystopia where all things are controlled by one person, a world where there is no freedom of thought and talk of change is not endured. The people controlling Jonas' world to be perfect even the families are made so that they are perfect. People are made to think what the rules say are right. Even their profession is chosen by other people. This book shows us the imperfect world hidden behind the fake exterior of a perfect world. I recommend this book to all young adults. A book which would compel you to ponder upon the concept of the perfect world which we all wish for. If you liked this book you would also like *The Seventh Tide* by Joan Lennon and *The Time Machine* by H.G.Wells both of which deal with the same concept of utopia and dystopia. A memorable and thought provoking book which cannot be easily forgotten. A compelling read.

- This story takes place in a utopia-like society. One of the most unusual

elements of the community was that the members were only able to perceive their surroundings in black and white. The central piece of the story was that one person (The Giver) was the sole owner of all past memories and the time had arrived to pass that information along to a successor (Jonas). The only persons experiencing any form of conflict in the story were Jonas and the Giver. Being without memories, the rest of the society, including the Elders who ran the society, were ignorant of any other way of doing things and were, therefore, content. Jonas was given the ability to see things from new perspectives, taking into account past pleasures and pains. He began to understand different moralities of situations and seriously doubted the way of doing things that he had previously accepted without question. This book is not necessarily a question of good versus evil, but rather a matter of learning from past experiences. Was the decision of 'sameness' the correct one for their community? Why wasn't euthanization (being released) a question of morality? Were the decisions of doing things for the good of the community really good for the community? And without memories, what was left to compare their lives to? I don't think that many children who read this story would care to live in that type of society. Middle School students (and I don't think that this book is appropriate for students younger than that) pride themselves on their originality. However, the topics addressed in this book are interesting for any students ready to consider them.
