## REVIEW OF THE GRUFFALOS CHILD

- Fahrenheit 451 is a prescient, cautionary tale about the dangers of censorship and the stifling of reason and empathy. Guy Montag, the protagonist, represents the moral conscience of a society gone mad. In the imaginary, hellish society created by Bradbury, Montag has conformed to the prevailing irrational belief that books are for burning--and, by extension, that the fire of intellectual curiosity is something to be extinguished. Yet persistent reminders of a time when people could think for themselves compel him to look for the causes of his own as well as his society's senselessness. A beautiful girl reminds him of the simple power of nature and art. An aging professor extols the virtue of great literature. In the process of Montag's search, the reader, too, explores the nature of curiosity and the forces that would squash it. For example, we come against the deadening superficiality of television and the unyielding closed-mindedness of the authority figures in total control. Unlike 1984, another dystopian novel pitting man against an irrational society, Bradbury offers a hopeful, uplifting ending, where those who would dare to think are about to escape to start a better world. This injection of cautious optimism is but one of the masterful flourishes Bradbury offers that make his work stand out from others of this genre. This is a magnificent story of the triumph of knowledge over artificiality and pretense.

- Fahrenheit 451 is a compelling story written wonderfully by Ray Bradbury. He has written the future's worst and gratest moments. Guy Montag has enjoyed being a fireman for mostly all of his life. He has been brought up learning that books would lead to rebellion and that the television would lead to the future. He has been enjoying the fun of burning books. He also has burned up the houses that held the books inside, but this is until he meets a seventeen-year-old girl named Clarisse McClellan. She tells him about a past when fireman had actually had stopped fires. The next thing Montag hears from a professor is of a future in which people are able to have their own differences and be able to think of themselves. This novel was fascinating. Ray Bradbury frightens his readers in telling a story of a possible future.
