REVIEW OF MCGRAW HILL MICROBIOLOGY LAB MANUAL ANSWER KEY

- George Orwell's classic '1984' was absurd to me when I first read it in 1984 at the tender age of sixteen. Now, at twice that age, I realize how close we really are to the horror he envisioned. It is a cynical and depressing look at how weak the human spirit really can be. Even now, it is appalling to see my generation sacrifice liberty for security at every turn. The novel leads you along expecting the best for our protagonist, but in the end his doom is sealed not by his own unwillingness to fight, but the unwillingness of mankind. A society where people would gladly live in shackles (even in the metaphorical sense) rather than make a stand for the right to live free, is not so hard to envision. The society described in Orwell's nightmarish future is only off by a few generations...we are on the road to "doublethink". WAR IS PEACE, FREEDOM IS SLAVERY, IGNORANCE IS STRENGTH. This novel should be read by all high school students, and read again by all parents.

• George Orwell's "Nineteen Eighty Four" is a brilliant warning about totalitarianism. It is certainly about communism. You can tell from their physical descriptions that Big Brother is Stalin and Goldstein is Trotsky. At a time when many people admired the Soviet Union, George Orwell saw the Soviet system for what it was- a brutal dictatorship based on fear. However, it is not just about communism. It is a warning against all totalitarian systems

of thought that seek to impose forcibly a particular ideology on people and to mould people at will. Winston Smith's struggle to hold on to objective truth in a world of lies and human decency in a world of cruelty symbolises the real life struggle to do just that of so many people in this century that has brought us the horrors of the Gulags and Auschwitz.
