REVIEW OF EDEXCEL IGCE PHYSICS QUESTION PAPER JANUARY 2014

- I am a student at Mercy High School in Middletown, CT. I found "Brave New World" interesting, although one of the more confusing books I have read, and I didn't understand the ending until I read it a couple of times. I understood what was happening when I had finished the book and was writing a summary because it gave me time to think over the plot. What I liked was that "Brave New World" was short and I could read it fairly quickly. I wouldn't say that it is my favorite book, but I do not regret reading it. It wasn't the science fiction that I usually read, but I can see why, for its time, it would be considered science fiction. However, I don't think it would be science fiction today because cloning is already such a big part of modern science that reading about it doesn't have the same effect that it would have had in the fifties or sixties. You would all enjoy the book which makes you think about what happiness really is -- being safe or being free?

- Simply one of my favorite sci fi books of all time.
