REVIEW OF CORE CURRICULUM INTRODUCTORY CRAFT SKILLS 3RD EDITION

- This was a very well written and descriptive book. It had lots of colorful language and as a nice little read. That being said it wasn't my favorite book of all time but it was only 100 pages and its a classic mystery-horror story. I would recommend it.
- "Great Illustrated Classics" series of classic books such as The Strange Case of DR. Jekyll and MR. Hyde by Robert Louis Stevenson are perfect books for children (and adults) of all reading ages. The text is large and easy to read. They all come bound in a glossy hard

cover. These books are fantastic for book reports and general reading for your school aged children. They will also put up with almost any type of abuse your child can put them through and still look great. Perfect for use in book report requirements of any school in the US. They are of course the classics and this title is no exception. These titles are perfect for the class room, to the school library or simply at home. The pricing on the new ones alone make this series obtainable in any home with school aged children. Whether they are new to reading or nearly graduating - this is a must own series! There are not many illustrations (about 2-3 per chapter) so older children would not be put off. I cannot say enough about these books - reading is so important, to have all the

classics in such a hardy book binding, great prices should make every parent
laid out in easy to read text at such want to purchase the entire collection!
