Racism and discrimination have choked economic opportunity for African Americans at nearly every turn. At several historic moments, the trajectory of racial inequality could have been altered dramatically. Perhaps no moment was more opportune than the early days of Reconstruction, when the U.S. government temporarily implemented a major redistribution of

land from former slaveholders to the newly emancipated enslaved. But neither Reconstruction nor the New Deal nor the civil rights struggle led to an economically just and fair nation. Today, systematic inequality persists in the form of housing discrimination, unequal education, police brutality, mass incarceration, employment discrimination, and massive wealth and opportunity gaps. Economic data indicates that for every dollar the average white household holds in wealth the average black household possesses a mere ten cents. In *From Here to Equality*, William Darity Jr. and A. Kirsten Mullen confront these injustices head-on and make the most comprehensive case to date for economic reparations for U.S. descendants of slavery. After opening the book with a stark assessment of the intergenerational effects of white supremacy on black economic well-being, Darity and Mullen look to both the past and the present to measure the inequalities borne of slavery. Using innovative methods that link monetary values to historical wrongs, they next assess the literal and figurative costs of justice denied in the 155 years since the end of the Civil War. Finally, Darity and Mullen offer a detailed roadmap for an effective reparations program, including a substantial payment to each documented U.S. black descendant of slavery. Taken individually, any one of the three eras of injustice outlined by Darity and Mullen--slavery, Jim Crow, and modern-day discrimination--makes a powerful case for black reparations. Taken collectively, they are impossible to ignore.

We live in a time of crises - economic turmoil, workplace disempowerment, unresponsive government, environmental degradation, social disintegration, and international rivalry. In *The 99 Percent Economy*, Paul S.

Adler, a leading expert on business management, argues that these crises are destined to deepen unless we radically transform our economy. But despair is not an option, and Adler provides a compelling alternative: democratic socialism. He argues that to overcome these crises we need to assert democratic control over the management of both individual enterprises and the entire national economy. To show how that would work, he draws on a surprising source of inspiration: the strategic management processes of many of our largest corporations. In these companies, the strategy process promises to involve and empower workers and to ensure efficiency and innovation. In practice, this promise is rarely realized, but in principle, that process could be consolidated within enterprises and it could be scaled-up to the national level. Standing in the way? Private ownership of society's productive resources, which is the foundation of capitalism's ruthless competition and focus on private gain at the cost of society, the environment, and future generations. Adler shows how socialized, public ownership of our resources will enable democratic councils at the local and national levels to decide on our economic, social, and environmental goals and on how to reach them. The growing concentration of industry makes this socialization step ever easier. Democratic socialism is not a leap into the unknown, Adler shows. Capitalist industry has built the foundations for a world beyond capitalism and its crises.

This is a print on demand edition of a hard to find publication. Explores

whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

## **REVIEW OF HAROLD RANDALL A LEVEL ACCOUNTING 3RD EDITION ANSWERS**

- In their first foray into the realm of fiction, Gene Hackman and Daniel Lenihan created "Wake of the Perdido Star", a novel that I believed to be one of the best seafaring novels of recent memory. It made me very eager for future efforts from this tandem. While it has been several years, the wait was well worth it. Their sophomore effort, "Justice for None", is a dramatic departure from their first work, but is a very enjoyable read. I was frankly quite surprised that Mr. Hackman and Mr. Lenihan would release a novel that is of an entirely different subject and historical era from their first one. It is something that, I believe, most authors have not pulled off well, and in doing so,

have alienated much of their fan base. However, Mr. Hackman and Mr. Lenihan proved to be the exception to this pattern. "Justice for None" is set in the small Illinois town of Vermilion on the eve of the Great Depression. The story involves Boyd Calvin, a struggling World War I veteran who gets caught up in the murder of his estranged wife, which leads to a pair of runs from justice before a climactic trial to prove his innocence. The Boyd Calvin character is developed very well, and proves to be an interesting focal point for this story. The authors created someone who elicits in the reader an internal conflict. On the one hand, he is a sympathetic character as he struggles with his dark history in the war, the reconciliation with his wife, and his fight against a justice system in which the odds are wholly against him. On the other, he is almost repulsive, as he consistently resists authority and pushes away those who are trying their hardest to help him. This character development works very well, and is somewhat rare to find in these types of stories. It holds your interest and keeps you locked into the plot. The plot itself is also intriguing, though it is perhaps more of a part of a broader view of this pre-Depression, Midwest society. It seems almost underdeveloped in some places, and was less of a driver in advancing the story. Rather, it supplemented the character elements and external events, such as the impending stock market crash, race relations, and small town life. While this would seemingly be a liability, Mr. Hackman and Mr. Lenihan made it work. The prose is descriptive yet sparse, which paints a very vivid picture, keeps the reader interested, and also serves to drive the plot at a rapid pace. I also give credit to Mr. Hackman and Mr. Lenihan for the story development.

Novels like this usually have a pretty standard ending that the reader knows at the outset. So, there is usually a "surprise" ending, which sometimes works but more often is picked up by the attentive reader well in advance. In "Justice for None", the authors somehow developed a storyline that was unexpected in terms of how the climactic moment would unfold. Then on top of that, they advanced the story to a wholly satisfying conclusion that had an element of surprise that was also not anticipated. What made the ending so good is that while it was a surprise, it was also rather subdued, which actually served to emphasize the impact even more. So often in reviews - my own included - there is the tendency to rate something in comparison to the authors' previous work. I tried very diligently to avoid doing so here, because of the stark difference between "Justice for None" and "Wake of the Perdido Star". If I were to rate this based on a comparison, I probably would rate this as 4 stars. However, taken as a stand-alone novel - which is more fair and representative of the work - it does merit a rating of a full 5 stars. Once again, the

work of Mr. Hackman and Mr. Lenihan has appealed to me as a reader, and I am once again looking forward to their next work. Hopefully, it will not be as long a wait, but I am eager to find out what they come up with next.

- Unlike a couple of these negative reviewers, I actually read the book. From cover to cover. In two days. And Charlene's daughter is named Stephanie. And her boyfriend is a physician's assistant, not a doctor. But maybe I'm just used to reading nice, long books and keeping a variety of characters straight--Carr's special gift. Obviously not a gift shared by some of these reviewers...This might be my favorite Robyn Carr book yet; it's certainly a bit lighter than some of the others (no domestic violence, for one thing). Charlene decides to get married, but to the wrong man. Charlene's mother is losing her mind, and her daughter is a spoiled brat. The men in this book are virtually all heroes; they just need to be matched up with the right women. Which, of course, takes 377 entertaining pages to work out. The only problem with Carr's books is that I keep finishing them!
