Sources Of The Self Making Modern Identity Charles Taylor

Charles Taylor's Sources of the Self has at least two objectives. On the one hand, it traces the historical sources of the modern understanding of selfhood. On the other hand, and perhaps more important, Sources of the Self aims to contribute to the reconstruction of that same understanding of selfhood. Specifically, it promotes the view that our description of the self should be radically revised so as to take seriously the interdependent claims that values have objective reality and ...

REVIEW OF SOURCES OF THE SELF MAKING MODERN IDENTITY CHARLES TAYLOR

- This book, along with Frank Herbert's Dune are the two cornerstones of science fiction. Many subsequent writers owe a debt to Foundation, which is best read within the original trilogy (Foundation, Foundation and Empire, Second Foundation. It is extremely exciting for anyone with a sense of the 'epic' questions of the fate of mankind, or for that matter, any large society or culture. A staggering achievement. It is hard to get to the end of this work and not want to pick up Foundation and Empire. Now I might add that I did not personally enjoy very much the subsequent "interference" with the books created by the subsequent novels - Foundations Edge, Foundation and Earth, and Prelude to Foundation. I think Asimov's idea for the story changed as he got older (certainly the "robot" angle is increasingly emphasised, which I think is to the general detriment of the series) and while I have not read much literary criticism on this topic, I would suggest the original idea was better.

- Of Burroughs' later work, this is possibly the most readable in conventional terms. Originally subtitled "A Boy's Book", it was molded by the adventure stories he read as a boy in the 1920's and 30's, and uses the genres of the detective story and the pirate yarn to give its shape. Typically for Burroughs, the novel begins with several false starts before a narrative begins to emerge - two stories, two centuries apart, being told simultaneously. Magic plays a key part in the plot, making some events and actions mysterious, not to say incomprehensible, but helping to unite the two tales. Eventually the two stories meet in the mythical Cities of the Red Night, where the theme of rebellion against total oppression is enacted in a series of vivid, dream-like episodes. His idealized youths fight the good fight against mutants and matriarchs, until victory seems within their grasp... This book is part of Burroughs' so-called Late Trilogy (being followed by The Place Of Dead Roads and The Western Lands) and includes characters and events from these later books and from previous works, but this novel can certainly stand alone as well. A rich and disorienting experience.
