A prize-winning historian's revelatory account of a close-knit band of wildly famous American reporters who, in the run-up to World War II, took on dictators and rewrote the rules of modern journalism "As intimate and gripping as a novel, this brilliant book vividly conveys what it felt like to live through the shocking crises of the thirties and forties."—Larissa MacFarquhar, author of *Strangers Drowning* They were an astonishing group: glamorous, gutsy, and irreverent to the bone. As cub reporters in the 1920s, they roamed across a war-ravaged world, sometimes perched atop mules on wooden saddles, sometimes gliding through countries in the splendor of a first-class sleeper car. While empires collapsed and fledgling democracies faltered, they chased deposed empresses, international financiers, and Balkan gun-runners, and then knocked back doubles late into the night. Last Call at the Hotel Imperial is the extraordinary story of John Gunther, H. R. Knickerbocker, Vincent Sheean, and Dorothy Thompson. In those tumultuous years, they landed exclusive interviews with Hitler and Mussolini, Nehru and Gandhi, and helped shape what Americans knew about the world. Alongside these backstage glimpses into the halls of power, they left another equally incredible set of records. Living in the heady afterglow of Freud, they subjected themselves to frank, critical scrutiny and argued about love, war, sex, death, and everything in between. Plunged into successive global crises, Gunther, Knickerbocker, Sheean, and Thompson could no longer separate themselves from the turmoil that surrounded them. To tell that story, they broke long-standing taboos. From their circle came not just the first modern account of illness in Gunther's *Death Be Not Proud*—a memoir about his son's death from cancer—but the first no-holds-barred chronicle of a marriage: Sheean's Dorothy and Red, about Thompson's fractious relationship with Sinclair Lewis. Told with the immediacy of a conversation overheard, this revelatory book captures how the global upheavals of the twentieth century felt up close.

Numerous jurisdictions worldwide have augmented their ratification of the New York Convention of 1958 with the UNCITRAL Model Law 1985 (UML), which takes a giant step forward toward global uniformity in legal application and understanding of the arbitration process. This book develops a standard or benchmark for the UML objective of uniformity, using the relevant legislation and case law of Hong Kong, Singapore, and Australia to consider whether a uniform approach to implementation of the UML and its interpretation is being achieved across those jurisdictions. The author's methodological tools are eminently adaptable to other jurisdictions. Given the importance of the ability to set aside an arbitral award, the body of case law on setting aside and the directly related area of enforcement, the emphasis throughout is on Article 34. In addition, the study considers: - the meaning of uniformity in law and in the context of the UML; - the correct approach to interpretation of the UML pre and post Article 2A; - the interpretational relationship between the UML and the Convention on Contracts for the International Sale of Goods (CISG); - the relationship between the UML and the New York Convention; - the degree of textual uniformity of Article 34 with the three jurisdictions focused on; and - the degree of

applied uniformity of Article 34 both in terms of juristic methodology and similarity of results. The author, with more than thirty years of practice in the field of commercial arbitration in Hong Kong, has had access to voluminous cases spanning decades and brings his specialist expertise to the subject. This book considers whether the UML has succeeded in its aim of achieving uniformity. It serves as a guide, both academic and practical, to exploring and adopting the correct approach to the interpretation of the UML as well as to the method of classification of court decisions under the UML. This study is of immeasurable academic and practical value.

Focusing on Australia, Hong Kong and Singapore Peterson Nelnet Company

As a composer, I have a long-standing interest in writing within collaborative contexts. I explored many different intersections of music with theatre as part of my doctoral research, including the areas of performance art and new 'music theatre.' Recently, this interest has manifested itself in my own work as a sound designer for theatrical productions. From 2002-2004, I designed three different shows for the UCSD Department of Theatre and Dance. In the fall of 2005, I was offered a professional sound design job with the San Diego Repertory Theatre for a new production of Shakespeare's King Lear. Through this project, I hoped to accomplish several objectives. One was to explore ways to create a unified compositional structure within the pre-existent narrative of a play. Another was to actually 'compose' sound effects, rather than simply 'plug in' effects from a library. A third was to attempt to dispense with the boundaries of 'composer' and 'sound designer,' fulfilling both roles within a single context. Most importantly, I wished to explore further avenues of collaboration with a director, in order to discover my own definition of a 'successful' collaborative effort. Through this project, I aimed to devise a framework for future collaborations and a methodology to balance my own artistic ideals within the larger parameter of a theatrical production.

## REVIEW OF BOSS DR 202

• The self proclaimed 'book' of laughter and forgetting is a wonderful tour-de-force that packs a punch concerning the concepts and ever recurring themes of life on earth. Kundera explores and questions the ideas behind laughter and the difference between laughing when things lose their meaning and laughing because of meaning. When reading this book you are sure to drown amidst the laughter of angels.

• I bought the books to understand the practical aspects of building a forest garden on my 2 acre land. I started reading the vol 2 because that seemed to contain the practical advice. However, soon after, I became convinced that vol 1 can not be ignored. Now I have read vol 1 and am truly in awe of the authors' clarity of thinking and organizing the vast amounts of material and data. The theory is clear and up-to-date with vast recent

scientific knowledge- a rare combination indeed. My only advice to a beginning reader would be to read the last part (conclusion) of vol 1 before and in between the various chapters in order to maintain motivation and interest in the overly theoretical- but necessarily so- parts of vol 1. That chapter really ties the theory together with your reasons of going into such details as are presented. I found in that chapter my "aha" moment. Thanks to the authors for these wonderful and helpful books. Are worth their weight in gold- or rich moist forest humus!
