REVIEW OF HOW TO DRAW HIP HOP

• Mr Hegg has obviously had differences with his own father sometime in the past. He has imagined a story about a young man's dilemma's growing up and tied it in beautifully with the Christmas story. Every American male should read this book or have it read to him. Then take 2 or 3 days to think it over and see if he can relate. It can remove any doubts about his own worth and about the worth of doing a job right. Maybe I'm reading too much into a juvenile story but I got the message that there's a deeper mature meaning to the last passage in the book. And Tom had the astuteness to leave it open to the readers interpretation. I absolutely loved

the book.

• John Brunner (1934-1995) was a prolific science fiction writer, one of many from England that had great commercial success in the United States. Muddle Earth was published in 1993. Admirers of Mr. Brunner's writings, and I count myself as a member of that large community, will, I believe, be somewhat disappointed in this, his last novel. The story is a tongue in cheek satire concerning an individual returned to life - resurrected - after being "frozen" for many years. Not an original story concept by any means but ripe with possibilities. Brunner employees this theme as an opportunity to lampoon just about everything - handled with a sharp barb this approach could be enchanting but Brunner uses a cleaver. There are

lots of puns, plays on other science fiction authors names (a medical machine is THEODOR Surgeon, another quack in Wrong Ghoulart and on and on) and a mammoth assortment of robots and disguised aliens playing historical persons - and some from Earth fiction -

Sherlock Holmes and Watson for example. A interesting book for the dedicated Brunner fans, but casual readers would be better entertained reading his "The Sheep Look Up" - "Shockwave Rider" - or "Stand on Zanzibar".
