REVIEW OF CHAPTER 8 PERSONAL FINANCE

- I believe that the Bible clearly reveals God's sovereignty in salvation. Beginning with the person and work of the Holy Spirit in regeneration (John 3:3-8; Titus 3:4-5). The work and provision of the Son, who justifies the sinner by the redemption paid by His shed blood (1 Peter 1:18-19; Col 1:20), and of course the purpose of the Father who according to His good pleasure causes us to be born from above (Eph 1:3-4,11; 1 Peter 1:3). However, as children of God who have been rescued out of the power of darkness, our soul's desire should be to reach the lost. We are after all ambassadors for Christ (2 Cor 5:20), and faith comes by hearing the word of Christ and the glorious gospel (Rom 10:17). I admit that sharing the gospel message has been something that I have failed miserably at. After reading this heart-felt book by an author I have deep respect for, I have been given me even a greater passion for reaching out to the lost. Psalm 97:10 says "You that love the Lord, hate evil". What could be more evil than to keep our mouths closed, when we may be just the vessel that God would use to save a soul from an eternity of torment separated from Christ.

- I first became aware of tse late in 2001 and have read many parts of it. However, this will not be my review of this book, but rather will focus on a rather important and unique commentary that may not have been covered here. This 2002 commentary, entitled 'Gore Wars', is by Judge Alex Kozinski. Judge Kozinski sits on the U. S. Court of Appeals for the Ninth Circuit. This 27 page essay can be found by a Google search: "Alex Kozinski" "Gore Wars". In his introduction one learns that the 'Gore Wars' is in reality, a review of tse. I don't know if Kozinski chose to couch his essay in the spirit of

Star Wars because so many of the claims and predictions of the environmental crowd come across as science fiction, but it is possible. Kozinski bemoans the long chronology of doomsday edicts that started with The Limits to Growth in the early '70s. He calls this tome "a bunch of hoey." He notes the most recent addition to this alarmist chronology is on global warming. At the end of his introduction Kozinski wondered whether anyone would ever write a book thoroughly analyzing the huge number of environmental scares and explaining how much was legitimate and how much was hype. That book is now here, namely tse by Bjrn Lomborg (BL), a Danish, environmental statistician. The first section in this commentary is entitled: I. The Phantom Menace. He notes that BL challenges "The Litany" -- namely the "list of hazards that environmental groups present as plaguing mankind." After much analysis BL reaches "different conclusions from the environmentalists about the kind, degree, pace and method of change that we should pursue." Kozinski continues "we should not be smugly satisfied with the current state of the world. "It suggests, rather, that we must be very careful about the type of changes we bring about, lest we undermine the very values that we seek to promote." Global warming is surely the number one area that we need to be very careful on what we do. The second section in this commentary is entitled: II. The Attack of the Clones. Kozinski notes this part of tse is where BL examines the state of the world in those many areas that have been the subject of alarmist predictions by the Clones. Kozinski notes that BL "paints a picture of a world where human welfare is dramatically improving in just about every way one might measure it." Yes, there are many ways things can be improved, but "all measurable trends point in a positive direction." The third section in this commentary is entitled III. The Empire Strikes Back. It should surprise no one that the Clones despise tse and BL and have launched a furious, almost desperate, counter attack. Hundreds, possibly even into the thousands of Clones have challenged BL. Two examples of critiques are by E. O. Wilson and John Holden, but BL defended his work against these inputs. The volume of attacks, however, has been so large that some have compared this to the Gallileo inquisition. The fourth section in this commentary is entitled IV. Return of the Luddi. Kozinski noted that as "poverty recedes - - and it surely has over the course of human history, despite increases in population - - the problems we fear have tended to be ameliorated or disappear, not get worse." He asks why "then do we hear so much bad news about the environment?" The answer to this question "is because environmental activists often lie, in big ways and small, in order to create the false impression that we are going from one environmental crisis to another." And Lomborg brilliantly "demonstrates the ways in which professional environmentalists play fast and loose with the truth." In short "Environmentalists manipulate data, so as to create a false picture about the state of the world. This is a very short summary of his review of tse. Go to Google and look up this essay.
