REVIEW OF SITUATION ANALYSIS EXAMPLE CAPSIM CAPSIM SIMULATIONS

- When I first started to read Lord of the Flies, I thought it would be typical boys on Island with no adults and have fun all the way to rescue or something like it. I had heard references to it here and there, but never quite knew what they meant until I read it. I must say, this book is a deep down excellent read. You can see it in two perspectives. One, you can read it without any symbolism, and

see a cool story, or look at it and take a exhaustive symbolism look and find a much cooler story. Golding is a perfect author in this story and the characters are far ore then what they are. This book features things that you wouldn't expect 6-12 or so year olds of doing. Such as canabalism, and even murder, as well as attempt of murder. It features not only a sick psychological perspective, but also some really light sci-fi.

- In the early part of the 20th Century a Englishman called Barry wrote a book called The Coral Island. It involved some children who were cast away in the pacific. Full of British pluck they quickly get organized and build a working civilization on the Island. They are more than equal, the adult natives they meet and have far higher and superior values.

They have many adventures and all end in triumph. The book was a hymn to Imperialism and the racist assumptions on which it was based. Pacific Islanders probably still ritually burn it as part of their independence ceremonies. William Golding's book has generally thought to be a response. Golding is apparently a deeply religious man and a number of his later books have religious themes. His theme is probably related his view of the nature of man. Unlike Barry he has a pessimistic view of the nature of man and his tendency for evil. He also starts by having a number of school children marooned on an island. The children are all male and appear to be from wealthy backgrounds. Initially there are attempts to collect food and carry on in a civilized way but things break down. A number of

the boys chase pigs and set up a pig's head as a sort of religious shrine in a clearing. Towards the end of the book the group turn violent. Golding's book has been prescribed on school texts for years. Unlike most books set for children to read most of them seem to like it. The imagery is startling and the book is quite short. Golding's other works never quite had the same impact as this one. In retrospect although a readable book it is hard to think that it is really about much at all. The subject of the work is after all just children. It is not surprising that poorly socialized kids placed in a difficult social environment might be at sea. The book's main message is probably a historic one putting in context the reality of what people are like and should be read in comparison to Barry's work

which suggested a more political view of white people. Despite the fact that the historical impact has declined the book is remarkable easy to read and the imagery is startling. It is probably a good bridge for children to move from kids to adult literature.
