Based on the popular Harvard University and edX course, Science and Cooking explores the scientific basis of why recipes work. The spectacular culinary creations of modern cuisine are the stuff of countless articles and social media feeds. But to a scientist they are also perfect pedagogical explorations into the basic scientific principles of cooking. In Science and Cooking, Harvard professors Michael Brenner, Pia Sørensen, and David Weitz bring the classroom to your kitchen to teach the physics and chemistry underlying every recipe. Why do we knead bread? What determines the temperature at which we cook a steak, or the amount of time our chocolate chip cookies spend in the oven? Science and Cooking answers these questions and more through hands-on experiments and recipes from renowned chefs such as Christina Tosi, Joanne Chang, and Wylie Dufresne, all beautifully illustrated in full color. With engaging introductions from revolutionary chefs and collaborators Ferran Adria and José Andrés, Science and Cooking will change the way you approach both subjects—in your kitchen and beyond.

Analysis of past developments in teacher education in Pakistan has shown that substantial progress has been made in this field. It has, however, been pointed out that education of science teachers still needs much improvement. At the present, there is an emergent need to meet the shortage of

qualified science teachers and at the same time to bring qualitative improvements in the courses offered in teacher education institutions. First, we recommend that the 1-year duration of teacher preparation is grossly inadequate for all teaching courses, and should be lengthened, and the qualifications for entrance be increased. We believe that teaching must be made a graduate profession. For example, the basic qualification of primary school teachers for admission to teacher education institution should be increased. We recommend that PTC should be made a 12 + 2 year program. Similarly, CT, 12 + 3; B. Ed. , 14 + 2; B. S. Ed. , 12 + 4; M. A. Ed. , 14 + 3; and M. Ed. one year after B. Ed. or B. S. Ed. Secondly, we think the quality of instruction in teacher preparation programs should be improved. Most teachers in the teacher preparation institutions use the lecture method most of the time. Prospective teachers behave like passive listeners to their teachers. They do not participate in the teaching/ learning process. Some instructors even dictate their notes to the preservice teachers. When the teachers join schools, they behave the same way.

REVIEW OF CHIMICA FISICA II CON LAB CHIMICA UNIVAQ

• I am currently taking an Accounting class with this book and I think it is great. It is easy to understand. It is very straight and to the point. It gives you plenty of real world examples from real companies and their financial reports (which makes it a lot more interesting than other Accounting books...) Also Amazon.com is great and I have always had great experiences with Amazon.com.

• Reagan began his acting career reading cue-cards in the service of General Electric during his stint at the "GE Playhouse." Reagan's move to the White House had him doing much the same, reading cue-cards written for him by Big Business, including GE, a weapons and energy conglomerate

that owns NBC. If people want to get a good feel for the Reagan administration, I'd recommend the books of Michael Parenti, who documents the legacy of dirty wars in Latin America and the global class war that is turning our planet into a dystopia of haves and have-nots. Globalized "Reaganomics" (aka, neoliberalism) is creating a planet of slums and prisons, war and ecocide. The parts of government that served the general public are being shredded, while the entitlement programs of war profiteers and various robber barons create record profits. It's interesting to see the reverence Kim Jong Reagan receives; but whether people like him or not is immaterial, he wasn't in charge of the country. Rather, very rich and

powerful corporate executives and an army of lawyers and lobbyists entrenched themselves during the Reagan administration. This corporate coup is something that many presidents have warned us about, including President Martin Van Buren who said, "I am more than ever convinced of the dangers to which the free and unbiased exercise of political opinion - the only sure foundation and safeguard of republican government - would be exposed by any further increase in the already overgrown influence of corporate authorities." If people can break-away from the Reagan illusion, and want to learn about real power in this country, I'd recommend the DVD "The Corporation," and the books and radio show of Thom Hartmann.
