REVIEW OF DISCOVERING AUTOCAD 2013

- I've always found it rather a cliché to say that a book has the power to change one's life. However, of any book that I've ever read, Viktor Frankl's Man's Search For Meaning has come very close to doing so. For the first time, I have found a desire to read and re-read an individual book, and have already asked others to read it as well. While it would be a tad exaggerated to say that it actually changed my life, I can say that it has had some powerful effects on my perspective on life. For the most part, it has reinforced my existing beliefs, but it has also made many things clearer for me, including the importance of one's search for

meaning in life. I found many parallels in Frankl's Logotherapy to William Glasser's Choice Theory, but Frankl's views were really more profound in many ways, due partly to his account of life in a concentration camp, and partly to his ties to existentialism. Frankl's portrayal of life in the concentration camp moved me in many ways, and on more than one occasion while reading the book. From the beauty he was able to find in unexpected moments within the hellish world of a concentration camp, to his ability to remove himself from the experience in the most humble manner, Frankl portrayed a life of suffering and anguish beyond words as having rays of hope, and even, for some, a sense of meaning. This is simply remarkable, providing for the reader a new sense of perspective on all aspects of life. Additionally, Frankl's explanations of the psychological stages of an inmate are truly enlightening. Honestly, I find it difficult to find the words to describe the first portion of the book. While it is both informative and illuminating with regard to life in a concentration camp, it is also poignant and truly inspiring, written from a different perspective than most accounts of the same subject matter.

- Dr. Frankl's book of Man's Search for Meaning, was written by him in only nine days. My suggestion for a reader is to try reading it in just one sitting, for it is just that good !! It is the only book that I just could not lay down until I finished it. Dr. Frankl, an existentialist psychotherapist, has a great outlook on life and is a religious man who through his trying experiences can help others get through bad times. The first part of the book describes his pain and suffering in concentration camps and "the why and the

how" he made it through the injustices unfairly brought upon him. His mother, father, brother and wife all died in the concentration camps. But, it was only when he got home that he found out their destiny. With all the pain and suffering that occurred, his will to live endured because of his research which gave meaning to his

life. Logotherapy, was covered in the second part of the book. According to Dr. Frankl, turning suffering or whatever comes your way into positive achievements is the real meaning to LIFE. You can make positive things happen from misfortune by understanding what your mission in life is to be.
