This book is the first to summarize the current knowledge of the cell biology of lens epithelial cells in relation to and in the development of posterior capsular opacification (PCO). PCO remains the most common long-term complication of modern cataract surgery, occurring months or years after cataract surgery, unlike most other complications that tend to arise during or soon after the procedure. Opacification of the posterior capsule appears to be linked to lens epithelial cells that are left behind in the eye during cataract removal. These cells proliferate, migrate across the posterior lens capsule, and undergo changes

that result in fibrous or pearl-type opacities in the capsule. The first section of the text explains the molecular mechanism and biology of lens epithelial cells that lead to the incidence of PCO. In the second part, in addition to a description of the mechanism and pathological condition of PCO, surgical methods and devices for preventing PCO are discussed in detail. Lens Epithelium and Capsular Opacification will benefit not only young clinical residents and junior researchers, but also established faculty in the clinical or basic academic field.

## REVIEW OF ESSENTIALS OF OPHTHALMOLOGY BY BASAK

- As a Grad Student in the 40s, I learned Schroedinger's formulation of Quantum Mechanics. He was a giant to me. I bought his book then. He noted that the Third Law of Thermodynamics said that Entropy always increased - things always went from order to disorder. Except for life, where atoms and molecules are put together to make order out of disorder. His conclusion is that if there is a God, it must be God that creates life. Sixty years later, I found the book again - with you!

- ... with one foot mired in Victorian propriety and the other in the modern world! On one hand to be so eager to challenge conventions, and on the other to be unable to bluntly declare his heroine pregnant! No novel I've ever read has been so plainly riven between two paradigms. Curiously, Two on a Tower begins in the democratic age of modern skepticism and then regresses inexorably to the class-conscious, superstition-bound era of

Gothic romance. The first three chapters of the book are as engaging an opening as any Hardy ever wrote, establishing a glorious setting in an abandoned tower in rural 'Wessex', introducing two prepossessing characters who will unquestionably become the love-interest of the tale, and brilliantly contrasting the folkways of a vanishing rural culture with the intellectual turmoil implicit in the discoveries of science in the modern world. The scene in which the new vicar attempts to persuade his local yokel choir to sing at A440 rather than the time-hallowed A415 is preciously funny, reminiscent of the earlier Hardy novels "Under the Greenwood Tree" and "Far from the Madding Crowd." But in close juxtaposition, the young 'leading man' - Swithin St. Cleeve - eloquently describes the fearsome anxiety he feels at realizing the infinitesimal insignificance of humankind in the scope of the cosmos. What he portrays is exactly what I (and you too, dear reader?) feel upon looking into deep time and empty space -- the feeling I call astrophobia. Swithin, admirably, is not daunted by his own insight; rather he aspires to contribute to that very knowledge which has made his traditional worldview unsustainable. Enter the woman, of course. Lady Constantine is an abandoned, abused wife, living the hollowest chivalric mockery of traditional male-female relationships. She's beautiful, she has resources, she's impressionable and impulsive... and she's eight years older than Swithin. She will, obviously from first appearance in the text, seek to find her 'realization' in Swithin's potential as a scientist and in her own role in furthering that potential. Obstacles, need we say, will arise. From chapter four onward, this promising 'novel of ideas' quickly transforms itself into the most rhapsodic Avon

Romance, superior to Danielle Steele only in the quality of descriptions. I should say, however, that as an Avon Romance, *Two on a Tower* is a darn good one. Significant coincidences and momentous chance encounters are the heart's pulse of the Victorian novel, the organizing principle, the primary means of compression of action, the successors to the "deus ex machina" of earlier epics. Every Victorian novel has a few of them, and it's silly to object since they are intrinsic to the genre. This almost-Post Victorian novel has more than its share, and they seem awkward here precisely because they fail to serve the modernist themes and dispassionate observations of the author. Perhaps in the age of pre-modern credulity -- that is, of religious certainty -- such fortuitous interventions of 'fate' were taken for granted. One could build a critical career, I think, by maintaining that the 'modern' novel was born when the last coincidence was excluded from the plot. I'm surprised that most of the previous reviewers have been charmed by this strangely tragic tale. I would have guessed that no one had ever been satisfied with its outcome. Certainly it was not a success at the time of its publication, and it hasn't received much respectful attention from literary scholars since. Me? I enjoyed it a lot, at the same time as feeling disappointed in it. Poor Thomas Hardy had the most divided 'soul' of any novelist who ever wrote, aching for the old certainties and the quaint tranquillity of pre-modern England yet somberly aware of their futility. He couldn't keep his footing on both sides of the chasm, so he chose to cultivate nostalgia for the very objects of his mockery. When a living man defines himself as 'conservative,' he effectively consigns his mind to hibernation. Hardy's 'conservatism' was a surrender to pessimism, a confession of

defeat before the battle.
