REVIEW OF IELTS MADE EASY STEP BY GUIDE TO WRITING A TASK 2

- I am making my way through the original Foundation trilogy for the third time now, and I'm still gaining new appreciation for it. Fifty years after it first appeared, Asimov's Foundation series can still justifiably be called a classic. A clear influence on the Star Wars saga, and probably Star Trek as well, along with a large chunk of all

science fiction that has come since. Sure there are a few things to quibble about with this series, and with this first book in particular. Asimov's vision of the distant future, with its nuclear reactors, microfilm communications, and picture phones, all seems ridiculously quaint today. As the story blasts through several decades, interchangeable characters come and go without making much of an impression, and this first book is so obviously part of a trilogy that it doesn't have a chance of standing on its own. But that's not the point, and by focusing on these quibbles you're missing the forest for the trees. Here Asimov has created a tremendous masterpiece of the imagination that is larger in scope than just about any other literary creation. The saga is built around

the intriguing concept of psychohistory, in which the movements of huge masses of people can be accurately predicted over thousands of years (while it is still impossible to predict the actions of any one person). An ossifying empire, obviously based on the Roman Empire in its death throes, is on the verge of horrific collapse when the Foundation is created to subtly change the course of history behind the scenes, and gradually rises to prominence and tries to usher in a new golden age. The entire saga (not just this first book) takes place over a thousand years across a whole galaxy, while Asimov believably incorporates a full palate of psychology, politics, and sociology to lend the story credence. Still a masterpiece after all these years.

- Asimov, remember, wrote this initially

as a series of short stories for a sci-fi magazine. Only later were the stories combined as a book. That is why of course no great character development occurs and the stories seem tidbits rather than grand scale work. Granted there is not much science in the book, but I have always felt that sci-fi is a form of fiction to allow the author to write freely on a subject and be able to mask what he is really talking about. Think about it, change the story to another world and have strange names for planets and suddenly nobody sees it as an attack against their country or their people. I have also felt science fiction to be more political than science (even though we call it science fiction). Politics are immense in Foundation and the style of having conversations to tell the story

vs. having lots of action and space battles is fantastic. I read this first when I was 18 and did not appreciate what Asimov is trying to do. At 39, I get it. Asimov is looking at society in general and commenting that no society can be perfect and ideal and all wonderful and that dirty tricks and greed and compromise and working with others (including our enemies) is the only way a society can survive and the rest is simply

propaganda. It's a direct attack against all societies that foster the idea that we're the best and the greatest and we stand for freedoms and love of country. Instead he states that what all societies become are survivors finding their strengths to counteract the enemies weaknesses. It's a great reality check which is why this should be required reading for all political science majors.
