REVIEW OF DUNGEON MASTERS CORE RULEBOOK II DUNGEONS DRAGONS

- This book was very interesting.I read it in 11th grade English. We had many disscussions and look deep in to the concepts of the book. It had our class debating on topics that were'nt even mentioned in the book, but brought the ideas to our minds.This book makes me wonder about what our future will look like with all the advanced technology thats coming about. Will we soon become the victims of a world like this book describes.....? The people in this book become almost like a slave to technology instead of technology becoming a slave to them.Is that happening to us now, always wanting fast entertainment, not applying our Knowledge to problems or circumstances in our lives,or maybe not even taking the time out to sit down and read something. Makes you think and thats what Brandbury does throughout this book. So if you like to take the time out to read a book,think about what you've read and apply that knowledge to intances throughout your life then you'll love this book.

- The writing was strange, as was the imagery.However, this book had a very good theme. Now, I know that everyone who reads this book will not see the same theme, but I thought that the theme was that life is better if you use your brain.It was also horrying to see that nobody knew what they were missing by not being able to read books, they thought that their wonderful big picture TVs would lead them through happiness, and that they could ignore the nasty things about life. But that's not the way that life is.
