An award-winning cultural history of how we experience the world through art, film and architecture Atlas of Emotion is a highly original endeavor to map the cultural terrain of spatio-visual arts. In an evocative blend of words and pictures, Giuliana Bruno emphasizes the connections between "sight" and "site" and "motion" and "emotion." In so doing, she touches on the art of Gerhard Richter and Louise Bourgeois, the filmmaking of Peter Greenaway and Michelangelo Antonioni, media archaeology and the origins of the museum, and her own journeys to her native Naples. Visually luscious and daring in conception, Bruno's book opens new vistas and understandings at every turn.

The twenty-first century has seen an explosion in the ways and means in which children can become part of celebrity culture. With the rise in popularity of reality TV, child beauty pageants, talent shows, and social media platforms, as well as more established routes to fame through TV, cinema, theatre and music, the number of children establishing a presence in public life continues to proliferate. *Childhood and Celebrity* brings together international scholarly writing and research about famous children, and representations of childhood, from a range of disciplines including Childhood Studies, Celebrity Studies, Cultural Studies and Film Studies in order to open up a theoretical space in which to explore and understand the complex relationship between contemporary childhood and celebrity culture. This unique collection includes detailed case studies of specific child performers such as McCaulay Culkin and Miley Cyrus, histories of child stars in the 'Golden Age' of Hollywood, analyses of representations of children in film and discussions of children as media creators and producers. Key themes of transgression, gender, 'coming of age',

childhood innocence and children's rights recur in the chapters and present a compelling argument for the emergence of the field of Childhood and Celebrity as an area of study in its own right.

The Oxford Handbook of Gender and Conflict SAGE Publications

Traditionally, much of the work studying war and conflict has focused on men. Men commonly appear as soldiers, commanders, casualties, and civilians. Women, by contrast, are invisible as combatants, and, when seen, are typically pictured as victims. The field of war and conflict studies is changing: more recently, scholars of war and conflict have paid increasing notice to men as a gendered category and given sizeable attention to women's multiple roles in conflict and post-conflict settings. The Oxford Handbook of Gender and Conflict focuses on the multidimensionality of gender in conflict, yet it also prioritizes the experience of women, given both the changing nature of war and the historical de-emphasis on women's experiences. Today's wars are not staged encounters involving formal armies, but societal wars that operate at all levels, from house to village to city. Women are necessarily involved at each level. Operating from this basic intellectual foundation, the editors have arranged the volume into seven core sections: the theoretical foundations of the role of gender in violent conflicts; the

sources for studying contemporary conflict; the conflicts themselves; the post-conflict process; institutions and actors; the challenges presented by the evolving nature of war; and, finally, a substantial set of case studies from across the globe. Genuinely comprehensive, this Handbook will not only serve as an authoritative overview of this massive topic, it will set the research agenda for years to come.

FINAL THOUGHT

History and Cartography in Nineteenth-Century America
Routledge

For most of the twentieth century, maps were indispensable. They were how governments understood, managed, and defended their territory, and during the two world wars they were produced by the hundreds of millions. Cartographers and journalists predicted the dawning of a "map-minded age," where increasingly state-of-the-art maps would become everyday tools. By the century's end, however, there had been decisive shift in mapping practices, as the dominant methods of land surveying and print publication were increasingly displaced by electronic navigation systems. In *After the Map*, William Rankin argues that although this shift did not render

traditional maps obsolete, it did radically change our experience of geographic knowledge, from the God's-eye view of the map to the embedded subjectivity of GPS. Likewise, older concerns with geographic truth and objectivity have been upstaged by a new emphasis on simplicity, reliability, and convenience. After the Map shows how this change in geographic perspective is ultimately a transformation of the nature of territory, both social and political.

The Cat in the Hat introduces beginning readers to maps—the different kinds (city, state, world, topographic, temperature, terrain, etc.); their formats (flat, globe, atlas, puzzle); the tools we use to read them (symbols, scales, grids, compasses); and funny facts about the places they show us (“Michigan looks like a scarf and a mitten! Louisiana looks like a chair you can sit in!”).

This book envisions the formulation of critical perspectives on education reform using the Philippine experience, recognizing the need to address relevant issues and challenges particularly in an increasingly globalized twenty-first century setting. A specific education

reform project, the Leaders and Educators in Asia Programme (LEAP), a joint effort between the Philippines' Department of Education, the Ateneo de Manila University in the Philippines, the National Institute of Education-Singapore and Singapore's Temasek Foundation, serves as the analytical focus of how education reform as a globalized movement is implemented, interpreted and made sense of by stakeholders involved in the reform project. This inquiry proposes to examine the problematique of education reform – from a Philippine perspective – by focusing on three analytical starting points: (1) describing the most relevant and urgent issues of education reform; (2) diagnosing the causes and consequences of reform failures; and (3) developing critical and contextualized perspectives on reform trajectories. *Mapping the Terrain of Education Reforms: Global trends and local responses in the Philippines* discusses the following: Challenges against effective education reforms The oscillation between global and local imperatives The dissociation between policymakers and practitioners Education reform aid in the Philippines This book will be of interest to researchers interested in education policy, politics, and reforms. It will also appeal to scholars examining Asian, and particularly Southeast Asian, educational systems.

Economic and cultural globalization and the worldwide threat of terrorism have contributed to the resurgence of patriotic loyalty in many parts of the world and made the issues it raises highly topical. This collection of new essays by philosophers and political theorists engages with a wide range of conceptual, moral and political questions raised by the current revival of patriotism. It displays both similarities and differences between patriotism and nationalism, and considers the proposal of Habermas and others to disconnect the two. Ideal as a supplementary reader for undergraduate and postgraduate courses in politics/political science especially in political theory, contemporary political ideologies and nationalism and in philosophy for courses on applied ethics and political philosophy.

REVIEW OF MAPPING THE TERRAIN OF THE HEART PASSION TENDERNESS AND THE CAPACITY TO LOVE

- A simple tale, but with complexity in tension-release cycle that does rely on the "villan/hero" trope which is overused to say the least.

• This book was completely silly, fun and light-hearted. Great for children and adults alike. The reader Nick Sullivan did a fantastic job making each and every character and penguin come to life in the reading. There was music and sound effects that helped with the ambiance as well. An overall great audio book experience. The story on the other hand is a bit dated and some of the penguin information is now found to be misleading. We all know that the male is the one who takes care of the egg and

that there are penguins living in other place than the South Pole. If your children read this book we just need to make these things clear to them if they ask. Also, I was quite disappointed that Mr. Popper never stood up for himself and let himself get pushed around by people he didn't even know. Mr. Popper was a very kind man who never wanted to cause harm to anyone. I guess it was a lesson on turning the other cheek, but man I would have yelled at the lady on the street, she was so mean!
