Educating Our Preschoolers Greenwood Publishing Group

Going Beyond the Theory/Practice Divide in Early Childhood Education focuses on the use of pedagogical documentation

as a tool for learning and transformation. Based on innovative research, the author presents new approaches to learning in early childhood education, shifting attention to the force and impact which material objects and artefacts can have in learning. Drawing upon the theories of feminist Karen Barad and philosophers Gille Deleuze and Félix Guattari, Hillevi Lenz Taguchi discusses examples of how pens, paper, clay and construction materials can be understood as active and performative agents, challenging binary divides such as theory/practice, discourse/matter and mind/body in teaching and learning. Numerous examples from practice are explored to introduce an intra-active pedagogy. 'Methodological' strategies for learning with children in preschools, and

in teacher education, are brought to the fore. For example: the neighbourhood around the preschool and children's homes is explored, using drawing and construction-work on the floor; mathematics is investigated in teacher education, using the body, dance and music to investigate mathematical relationships and problems; taken-for-granted forms of academic writing are challenged by different forms of praxis- and experience-based writings that transgress the theory/practice divide; children, students and teacher educators use pedagogical documentation to understand their own learning, and to critique dominant habits of thinking and doing. Challenging the dominant understanding of 'inclusion' in educational contexts, and making

'difference' actively visible and positive, this book is rooted in the experiences, practices and words of teachers, teacher educators and student teachers. It will appeal to all those involved in early childhood education and also to those interested in challenging educational thinking and practices.

Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. REVIEW OF EXAMPLE OF PRESCHOOL OBSERVATION DOCUMENTATION AND

ANALYSIS

- I have read "The Boleyn Inheritance", "The Queen's Fool" and this one. All three were very entertaining, but light on accuracy. OK, so the author took license. But, as I have studied Tudor history for years, it is a little irritating that so many liberties were taken. Nevertheless, I will probably read the others in the series. "The Other Boleyn Girl" is satisfying in its descriptions of the court and times. The story line interesting, telling Mary Boleyn's story, neglected by many historians. The most maddening thing about all Gregory's books is her use of poor grammar. Surely, an author writing about English history should not so ill use the Queen's English!

- I loved this book. It was well written and engaging and I found myself not able to put this book down. In the end I wanted more and became hooked on this writer. Everything she writes is amazing (Except the Wideacre trilogy which I hated) But Everything else is well worth the money
