REVIEW OF YAESU FT 450 AND TS 450D RECOMMENDED INTERCONNECTION DIAGRAM

- This is a book debunking, successfully in my opinion, the popularly accepted idea that a asteroid hit the earth 65 million years ago. The asteroid impact theory actually consists of two parts,one that a comet hit the earth 65 million years ago and the other that this caused a mass extinction of life on earth. Most professionals knew the second part was nonsense from the get-go, the mass extinction took place over a two million year long period and could not have been caused by an asteroid strike. However there was always the coincidence of the timing of the impact. Officer and Page

summarized data that points out that there is no evidence for an impact that cannot be better explained by other sources or indicates that evidence is being contorted (to say the least), i.e. volcanism is shown to have been the source of the iridium layer, the Chicxulub crater the wrong age, etc. The authors may have written a more important book than they intended, in debunking a popular psuedo-scientific theory (there is simply no non-debatable evidence of an impact) they show how nonsense is turned into fact by repetition and politics. Note; the book is written for laymen and not

professionals. Then again professionals do not need it.

- I'm impressed with these horse sellers...they did some amazing negotiations and product development. They were honest in their own way and I liked the competition between sellers and buyers..sometimes the shark was the guppy and didn't know it.
