## REVIEW OF PRACTICAL MANUAL ALAGAPPAN

- You know those dreams that are especially absurd, but quite realistic? So realistic that reality and fiction have a strange way of mixing the next morning? You awake thinking that your boyfriend is angry at you for cheating on him. With Val Kilmer. Or that you won the Apprentice and are now working for Donald Trump, not at your pathetic job shelving books in the library. And for that brief second reality is clouded and hazy. You have to spend a minute or two telling yourself that you don't even know Val Kilmer. Such is Georges Perec's *W*, or the Memory of Childhood. It is a confounding blend of reality and fiction. In the beginning it is easy to make a clear distinction, but by the time you reach the end you are not sure where one ends and the other begins. It takes a second to sort it all out. Be forewarned. This is not a book for the Danielle Steele fan. The story is a twisting dual narrative. One narrative is a memoir of Perec's own childhood during the Holocaust. The other a created story about an island obsessed with sport. Both stories seemingly have nothing to do with the other, but by the end of the book you understand that one was written for the other, the effect much like transposing two photographs on top of each other. Perec's childhood is with recounted (not in italics) with factual lists—he had a mother, a father, a potty, a cot—and a confession that he has little memory of his childhood. He tells the reader how he remembers his childhood—recalling to the reader the way he recalls it, not how it may have actually happened. (He adds addendums now that he is older to help aid the confused reader.) He retells his childhood devoid of emotion—his mother is sent to the death camps, his father killed in combat, he is sent to different border schools. It is stark in black and white print, told with a voice of indifference. It is this lack of emotionalism that sets the tone for the other story—the story of *W* (in italics). Woven just as elusively in his memory of childhood is the story of *W*. *W* is a tiny island that at first glance seems to be a land of joy and triumph—a land where the Olympic ideal is revered and honored. It is in the tale, in this island of *W* that we learn of

unspeakable horrors, where champions are elevated like gods and losers killed, beaten, and tortured. A land where Law is chaos and deceit is rewarded. A place where there is no value for human life, just the result it is capable of producing. It is this grotesque story that is charged with emotion and we recoil in repulsion. It is in this story that Perec connects with his own memory of childhood and shares with us how he feels. Perec tells us, "How can you explain that what he is seeing is not anything horrific, not a nightmare he will suddenly awake from, something he can rid his mind of? How can you explain that this is life, real life . . . wherever you turn your eyes, that's what you will see, you will not see anything else, and that is the only thing that turns out to be true." (Perec 139-140). Perec's unusual method allows us to experience the history of the Holocaust in two ways: one a factual representation of the author's own life and the other an emotional horror through the story of W. It is in W we see the full extent of what human nature is capable. Because of this W, or the memory of childhood will haunt and challenge you. It is branded in your memory, as you try to understand it. It takes a second to sort it all out.

- The book *Alice's Adventures in Wonderland* by Lewis Carroll was a creative trip into the world of dreams. Lewis Carroll is most famous as an author, particularly for writing *Alice's Adventures in Wonderland*. He was also a mathematician, Angelical deacon, and photographer. Carroll originally created the story for Alice Liddell, a child he befriended while he was a deacon at a local church. She loved the tale and asked him to write the story down on paper. At first he hesitated. Two years later, Carroll agreed, and the classic story was born. Carroll's main goal for writing the book was to get children interested in reading. Lewis Carroll was actually a pen name for Charles Lutwidge Dodgson.

His work was mostly considered to be literary nonsense, and *Alice's Adventures in Wonderland* is a classic example. Many people, ranging in all ages, have enjoyed Carroll's fantasy and word play writings. Carroll's way of writing has influenced many authors all over the world. Although Carroll's writings are very creative and imaginative, Carroll wrote a book with too many hidden meanings in it. For instance, the references to drug use are too prevalent. The first run-in Alice has with drugs is with the caterpillar. She stumbles across him sitting on a mushroom. He is smoking hookah and blowing rings of smoke toward Alice. Shortly after Alice leaves the caterpillar, she meets the Mad Hatter. He was a hatter, which means that he would inhale some of the mercury fumes that were used to cure felt in some of his hats. Mercury poisoning results in brain damage and confused speech. The last drug reference occurs when Alice eats and drinks the substances that make her grow or shrink. Alice did not know what she was consuming. She ate and drank it anyway and she ended up growing or shrinking. Carroll intended that children read the book. He might have sent the wrong messages. Children might think that Alice has fun eating and drinking mysterious substances and they would too. Also, Carroll actually wrote a very complicated book that most young children probably could not understand. He used a lot of literary techniques like reversals, puns, and mirror writings. These could easily be overlooked and misunderstood by children. Lewis Carroll tried to write the book from Alice Liddell's point of view to make reading enjoyable for children. He wanted to prove that children could have thoughts that were as complicated as or more complicated than adults. If the reader will not try to dissect the meaning of each word and wants to feel like a child again, then this book would be a good choice.
