REVIEW OF SPREADSHEET BASED DECISION SUPPORT SYSTEMS

- I recently was in a discussion group with the author and my class on the book It's all about the moon when the sun ain't shining. I thought this book was very interesting and would suggest it to anyone who like to read a good book especially one based in Louisiana. The author who turned out to be quite a character explained different details from the book which i found to be quite interesting. I loved the book!!!
- Don't let the summary fool you. It sounds interesting, but it's horrible. The plot is pointless, the characterizations are unrealistic, and the main character is definitely not likeable. The entire time I was reading the book, I kept waiting for the good part to start, and then I read the last page and realized it never came. I wouldn't recommend this book to anyone.
