The distinct narration design, relatable personalities, and story twists make it a worthwhile addition to your shelf. So, if you're looking for a fascinating read, Credit Risk Modeling Using Excel And Vba is definitely worth taking into consideration.

REVIEW OF CREDIT RISK MODELING USING EXCEL AND VBA

- I have read all of Patricia Cornwell's books and find them to be intensely satisfying in regard to character development through time because she uses the same characters in each book. You need to start with her first book to get the full benefit of character development. (These books are the ones she has written about Dr. Scarpetta, et al.)Her books will also keep you page turning much longer than you should if you read before bedtime. The information which she researches (and provides the reader while reading) is quite complete in relation to each story theme.Patricia Cornwell is my favorite author of suspense novels.READ HER! She's great!

- I really enjoyed reading this! It wasn't a page turner the way So Long, See You Tomorrow was, but the writing was wonderful, and it left me with questions to which I had to go find answers. It is on my list as a potential book club selection - lots of interesting characters with interesting motivations, etc.The story is set in a small town in the mid-west in the early 20th century. The writing is superb. Maxwell does a marvelous job with his characters. It started off slowly, but picked up and ended with a bang. I'm already looking for the next Maxwell book to read. So glad to have found him!
