## **REVIEW OF PROJECT MANAGEMENT ABSOLUTE BEGINNERS GUIDE GREG HORINE**

- This book, by Michael Klare, goes into much detail explaining how conservative leaders and think tanks have not only led us into a disastrous war in Iraq, but in addition have set the United States on a course to actually import more and more oil from unstable and despotic foreign countries in the future. Before the latest Iraqi war I didn't believe the war was about oil, perhaps it was a side issue, but Klare goes into much detail here, illustrating the fact the war is primarily about securing a large and

continuous oil supply for the United States. It is true, as Klare points out, that Presidents since FDR have placed a high value on Middle East oil, but the Bush administration has taken intervention to a new and dangerously high level. Several documents are referred to by Klare, one very important one was by the National Energy Policy Development Group, in 2001, headed by none other than Dick Cheney. This group gives full support to the use of the military of the United States to secure foreign oil sources, only giving lip service to alternate energy development, and almost nothing to conservation measures including raising CAFE standards. I have to say that I find this

amazingly short sighted. Now that President Bush and his 'advisors' have gotten us into an endless resource war in Iraq it is evident to any thinking person that we are in a mess with nearly no end. In addition, our military, in their 'precision' strikes, have, as of 10-04, killed an estimated 21,500 Iraqi civilians, to me this is atrocious and another reason the terrorists have been able to easily recruit people. Klare goes into detail how we join forces with despotic regimes around the world in search of additional supplies of oil, and this includes the House Of Saud. As a result of this, Klare points out, and with the stationing of U.S. troops on sacred Middle Eastern soil, we have invited the fury and hate of many, many Arabs, this cannot but end badly. Klare states that this policy of using the military to rely more and more on foreign supplies of oil may lead to price shocks, supply interruptions, and in a worst case blackmail. And of course an unending stream of terrorist attacks against U.S. interests all over the world. I found the last chapter of this book to be the most interesting, however. Here, Klare presents a somewhat detailed outline of what we can do to reduce our dependence on foreign oil. Of course, conservation plays a big role, including raising the Cafe standards for cars and light trucks, and eventually for heavy

trucks as well. Alternate energy sources must be developed. And we should, in the future, refrain, Klare points out, in supporting corrupt regimes around the world just for the sake of their oil, this alone will give us much more credibility in the world. We have squandered hundreds of billions of dollars in useless and counter-productive military adventures, Klare gives us ideas of how we can do better. This book is largely about the geopolitical aspects of the global supply of oil. For a comprehensive

treatise on the impending peak of the global production of oil read HUBBERT'S PEAK by Kenneth Deffeyes, and THE PARTY'S OVER by Richard Heinberg.

- My husband and I read through a daily devotional every day before we get on our mat. It helps us with intention and focus. Written by someone who seems to have been through significant life challenges and has found his way to a meaningful and fulfilling life. Appreciate the candidness.
