REVIEW OF CHESS 5334 PROBLEMS COMBINATIONS AND GAMES LASZLO POLGAR

- Fahrenheit 451 Ray Bradbury Science Fiction Fahrenheit 451 is a story set in the future about a fireman who starts fires. Unlike today, all houses and buildings are fireproof, making you think firemen would be unnecessary. Firemen however, have a different job. They burn books. If a civilian is found with a book, Guy Montag and the other firemen burn it, and the person is sent to jail. All his life Montag had thought burning books was the right thing to do, something to which the world had become accustomed. Then he met 17-year-old Clarisse. She had what was then considered an unusual family. They would just sit and talk for hours at a time. Montag begins to form a friendship with this girl, and comes to believe she has a lot to teach him. Clarisse walks Montag to work everyday, talking to him about many things; her uncle, about how people don't talk about anything, and about the wonder of books. Then, one day, Clarisse disappears. She isn't there when Montag walks to work, making him surprised and confused. After a few days without Clarisse, Montag asks around, and finds out she was killed in a car crash a few days ago. Not having Clarisse to discuss life with causes Guy to wonder, is burning books right? What ideas do these books hold? This story is continued as a trail of where this thought takes him, and of the tragedies and joys that occur because of it. I believe the writing style of this book fits what Ray Bradbury expects life to be like in the future. It seems to be slow, dry, and boring. Bradbury uses detail to the point where it is meaningless. He gives three examples when one would do, and elongates things until they are uninteresting. At one point in the story Montag is sitting in the firehouse, listening to all of the sounds. Bradbury explains about 'the flutter of cards, motion of hands, of eyelids, the drone of the time voice in the firehouse ceiling, and the tick of playing cards on the greasy tabletop.' It would have been much easier and quicker to use two examples and get on with the story. No part about the book hooked me, and I had a hard time finishing it. Although the plot was good, this book could easily have been fifty pages shorter. The author is also very repetitive; using the same dry language many times over. Words like pretty, and nice can be found repeatedly as the story progresses. Although I'm not in love with this story, I think it's worth reading. This book made me realize how in America we always talk about being having freedom of speech, but never what we can or can't read. I can't imagine a world where one of the things I love the most was outlawed. Overall, I can't really give this book a number of stars. Scoring Fahrenheit 451 on my enjoyment, it gets about two stars, but on making me think, it gets five.

- Ray Bradbury is amazing. Fahrenheit 451 is an amazing book. So amazing in fact that I did my senior research paper on it. The plot is about Guy Montag (protagonist) learning about censorship and the death that accompanies it. The symbolism is very deep in this book. For example, the story mentions burning books, which is linked to destroying knowledge. Through intricately woven twists, it becomes apparent that Bradbury wants us to realize that knowledge and individuality are the keys to being alive and that when those are lost, regardless of our medical condition, we are dead. The obvious theme is of course censorship, but if you're willing to read it carefully and give some serious thought as to what's being said, you can see a much deeper message. This book should be required for admittance to society. Read it. You won't be disappointed. And don't pay any attention to those negative reviews - they are the people that this book talks about: the morons in our society who don't see the folly of ignorance.
