- This was a very entertaining and interesting book. I thought Twain did a great job incorporating the newer (of his time) technologies into the old mid evil times. Not only did I think he did this very well; he had a very interesting take at explaining the great achievements of knights that do not seem to be what we would consider real. Like when knights fought giants and things of that nature, and how magic was explained. I thought it was interesting how he explained that a lot of the knights did not really do a lot of the things that they said, like kill ogres and giants, they only said they did because no one was around, and no one ever questioned the adventures that the knights told of. Another cool thing was how he incorporated newer technologies, like gunpowder, into how he did his "magic" and made people

believe that he was a great sorcerer. This was a very good and interesting book, and I would recommend it to anyone.

- Mark Twain is, of course, a famous writer and a producer of a number of US classics. But this one is just too much of Mark Twain trying to make nasty remarks in order to be a cynic and too much of pushing American chauvinism, against too little realism to be bearable. Fine, 19th century Americans (and 20th and 21st as well) believe as a religion that their republic was the best invention since sliced bread and every other country in the history of the world was a land of morons. But this story depends on some far-fetched underestimation of human beings (or overestimation of Americans in relation to all others) in combination with sweeping generalizations and a lot of sweeping history under the rug. In short, I didn't like it.
