## REVIEW OF OPTIMIZATION OF SUSPENSION PARAMETERS TO IMPROVE IMPACT

- I waited a long time before I got around to reading C.S. Lewis and regret my procrastination. He is not only a prolific writer but he comes across as a humble person. How refreshing to find one who is so brilliant. He is not only close to God but he is able to articulate his views allowing many of us to make progress on our personal journeys. He may have some philosophical flaws but "Mere Christianity" is a great starting point for those with no religion. I found his short chapters to be easy and pleasant readings while fortifying my faith. I was able to merge many of his thoughts into my own positions. This is not a take it or leave it offering. I have to strongly recommend this book to all at the risk of drawing people into a Christian sect other than my own. Borrow it or buy it and then read it. It should change you as it has changed so many others.

- Mere Christianity is a Christian apologetic, that is, a reasoned attempted to defend and argue for Christian faith. The Christian apologetic is a bit of a lost art these days (the atheist apologetic, on the other hand, is all the rage). Christian apologetics fell out of fashion perhaps in recognition that apologetics, whether Christian, atheist, or other, are doomed to failure. They attempt to by reason defend and argue for that which must, ultimately, be accepted as a matter of faith. Lewis magnifies his task by taking a particularly rationalist tack. Lewis also devotes a large part of Mere Christianity to laying out the basics of Christian belief. Frankly, I think this is more important than the apologetic, so I'm glad Lewis includes it. Lewis is certainly one of the great writers on Christianity of the 20th century. Mere Christianity is the most fundamental, basic, and broad of his religious books. I must say it pales beside A Grief Observed, though. But then pretty much any book pales beside A Grief Observed (I'm waiting to review it until my petition to Amazon to add a seventh star comes through). While Lewis's work, in my mind, is in most ways and in general superior to Chesterton's (The Everlasting Man), faith is not well suited to a rationalist explanation. It's called faith for a reason. Chesterton understood this and to his credit focused on the unexplainable to demonstrate the possibility of the unexplainable. Chesterton's prose in The Everlasting Man reminding me of that of, of all people, Christopher Hitchens. For both their own literary flair can obfuscate their point. For all his success writing fiction, Lewis never lets his prose get in the way of his persuasion. As another reviewer notes, he writes in "clear, concise, conversational prose." I do highly recommend Mere Christianity to anyone looking for an attempt at a rationalist argument for Christianity and the basics of what Christians believe. I also think it would make it onto the list of one or two dozen books every Christian should read at some point in their life.
