The Cambridge Primary Review Research Surveys is the outcome of the Cambridge Primary Review – England's biggest enquiry into primary education for over forty years. Fully independent of government, it was launched in 2006 to investigate the condition and future of primary education at a time of change and uncertainty and after two decades of almost uninterrupted reform. Ranging over ten broad themes and drawing on a vast array of evidence, the Review published thirty-one interim reports, including twenty-eight surveys of published research, provoking media headlines and public debate, before presenting its final report and recommendations. This book brings together the twenty-eight research surveys, specially commissioned from sixty-five leading academics in the areas under scrutiny and now revised and updated, to create what is probably the most comprehensive overview and evaluation of research in primary education yet published. A particular feature is the prominence given to international and comparative perspectives. With an introduction from Robin Alexander, the Review's director, the book is divided into eight sections, covering: children's lives and voices: school, home and community children's development, learning, diversity and needs aims, values and contexts for primary education the structure and content of primary education outcomes, standards and assessment in primary education teaching in primary schools: structures and processes teaching in primary schools: training, development and workforce reform policy frameworks: governance, funding, reform and quality assurance. The Cambridge Primary Review Research Surveys is an essential reference tool for professionals, researchers, students and policy-makers working in the fields of early years, primary and secondary education.

REVIEW OF CAMBRIDGE PRIMARY EXAMINATION PAPERS

- Draper and Smith have long had a reputation for an outstanding book on regression analysis written at an elementary to intermediate level. I have long had a copy on my bookshelf and continue to purchase the revisions. They are careful to keep the book current by always incorporating new advances. This edition includes many of the recent advances in regression diagnostics as well as a description of the bootstrap approach to regression problems. Those interested in regression graphics should consult the book by R. Dennis Cook. More on the bootstrap can be found in my book "Bootstrap Methods: A Practitioner's Guide" or the other fine books by Efron and Tibshirani, Davison and Hinkley, and Lunneborg.

- I would not really recommend this book. I found it to be a strange book, it did not make a whole of since.
