## **REVIEW OF LIBRO MICROBIOLOGIA MEDICA DE SHERRIS 5TA EDICION**

- Jonas never knew that there was more out there. In the book *The Giver* by Lois Lowry, the main character Jonas lives in a totally controlled society, it is so controlled they can't even see color. In this story, the government controls everything. I do not like this book because it is written in a very formal style. Besides that, I think others might like this book because it is an interesting idea for a story. This book is about a boy named Jonas whose life is totally changed when he turns thirteen. He gets a very special job. Because of his job, he gets emotional. He can see colors and he can know the pain of the past. This job is

unique because only one person is chosen for it. After a couple of months working he realizes what a terrible world he lives in and decides to go elsewhere to change his life. This book is written in a formal way that middle school kids might not understand. All the characters talk in a really stiff way. For instance, when Asher speaks angrily to Jonas, he then says "I apologize for not paying you the respect you deserve." The language is hard to read, and this makes the book it confusing. There are common terms, like "released", that seem unfamiliar because they are used in a different way than I am used to. The type of dialogue the author uses makes the book hard to read. I would recommend this book for people who do not like action. This book is very slow. After I had read four two weeks, nothing had happened. I prefer book that are exiting like when you get into something right away. The story however had an interesting. Them that might interest some people. I seriously did not like this book. The dialog was confusing and it was incredibly slow. If there was a bit more action, I might have liked it. However just because I did not like this book, does not mean you will not.

- Jonas has a good life , or so he thinks. His people live in a controled society. No one's rich , but no one's poor. When he becomes a Twelve, not the age twelve but a Twelve, his whole life changes. Cheif Elder chooses him out of all the other Twelves to become a Reciever of Memory. What's a Reciever of Memory, Jonas asks himself shocked! He knows nothing until his training begins. There Giver, a Reciever of Memory before Jonas, teaches him about snow, color and other things of the world. He later relize that the life he has isn't so great. Curiosity gets the best of him and starts asking questions. The release is the one thing that he wonders about the most. It's hard for Giver to tell him , but he does. Regretting he ever asked, Jonas knows what he must do so he can actually have a life. This book is almost guaranteed to make you cry, even if your a guy! This book is so great in so many ways that I can't explain it. If you want to know what I mean then read "The Giver" and other books of Lois Lowry
