Originally, C was designed for writing 'systems' programs—things like operating systems, editors, compilers, assemblers and input/output utility programs. But, today, C is used for writing all kinds of applications programs as well—word processing programs, spreadsheet programs, database management programs, accounting programs, games, robots, embedded systems/electronics (i.e., Arduino), educational software—the list is endless. REVIEW OF E BALAGURUSAMY PROGRAMMING IN C 7TH EDITION

- Yipes o' mighty why would peoples wannna write and speak when they can txt on the mobile phone? Smiley face, LOL. Actually this is a fine but slightly dated book. I found it a little too simple and quaint for my tastes. I thought I held the minority opinion about this book but then I cheated and read the other

reviews for this book. It turns out most people agree. I must confess, I began writing this review only because I thought it would be a humorous premise to pretend that I could not write or speak correctly. I changed my mind and decided that I am stronly in favor of any tool to teach people how to write and speak properly and should not make light of the book. It was worth every penny I paid for it on the Kindle.

- One thing I learned was how deep and wide the African American woman is wounded in her self esteem by the effects of racism. I think it is a shame that Sister Souljah who seems so strong on the surface carries within her such a desperate whimpering need for the attention and approbation of black men no matter what. It is so strong and overriding that the very idea of interracial dating drives her into a rage, but not at a black man who might be dating a white woman. No Sister Souljah's rage is reserved exclusively for the white woman. That's pretty convenient for the black man don't you think? I was at a party once where a black guy hit on every white woman there. The line he used was that they should sleep with him to prove they weren't racist. I would like to hear how Sister Souljah would rationalize this obnoxious-on-so-many-levels kind of behavior. It is bound to be inventive. All that said, this is a very interesting read but I really couldn't give it 5 stars because the child has too little self knowledge. And if I had been her mother and she made the remarks she made about who I choose to date, I would have slapped the snot out of her.
