Competitiveness of a country requires continuous upgrading and, sometimes, major transformation. Thailand is at the crossroad. It can no longer pursue a strategy based on low-cost advantages, but its capability achievements are still too low to become an advanced economy. This book points out weaknesses of Thailand's national innovation system or education and suggests how the country should develop new capabilities to survive and prosper in the globalized and fiercely competitive world. Footprints in the Mind is a collection of short stories in two parts. I was tempted to call the stories Footprints in the Sand, but on reflection I realized that footprints in sand do not last very long whereas the "footprints" I wish to describe are embedded in my mind. I hasten to add, however, that the stories are fictional. I probably have met some people like those in the stories and perhaps at some subconscious level they are real but my stories are a work of fiction. I cannot honestly say where they come from. They seem to pop up out of nowhere.

Technologies and Approaches to Reducing the Fuel Consumption of Medium- and Heavy-Duty Vehicles evaluates various technologies and methods that could improve the fuel economy of medium- and heavy-duty vehicles, such as tractor-trailers, transit buses, and work trucks. The book also recommends approaches that federal agencies could use to regulate these vehicles' fuel consumption. Currently there are no fuel consumption standards for such vehicles, which account for about 26 percent of the transportation fuel used in the U.S. The miles-per-gallon measure used to regulate the fuel economy of passenger cars. is not appropriate for medium- and heavy-duty vehicles, which are designed above all to carry loads efficiently. Instead, any regulation of medium- and heavy-duty vehicles should use a metric that reflects the efficiency with which a vehicle moves goods or passengers, such as gallons per ton-mile, a unit that reflects the amount of fuel a vehicle would use to carry a ton of goods one mile. This is called load-specific fuel consumption (LSFC). The book estimates the improvements that various technologies could achieve over the next decade in seven vehicle types. For example, using advanced diesel engines in tractor-trailers could lower their fuel consumption by up to 20 percent by 2020, and improved aerodynamics could yield an 11 percent reduction. Hybrid powertrains could lower the fuel consumption of vehicles that stop

frequently, such as garbage trucks and transit buses, by as much 35 percent in the same time frame.

## **REVIEW OF 2010 ISUZU D MAX**

- This book should rapidly become a standard reference work for anyone working with HTML. Given that the World Wide Web is something of a moveable feast, and given that HTML will probably be very different in ten years time, nevertheless Thomas Powell has put together a superb manual that presents information in a clear and concise fashion. His writing style is clear and articulate without the verbosity that is sometimes associated with what is, after all, a potentially complex subject. Information is easy to find and well indexed and the examples are copious. Mr Powell is also to be congratulated for creating a work that should appeal to beginner and expert alike. In short, just about the best work on HTML around - I just wish I'd bought the hard-back version as my copy is looking decidedly tatty because of the use it gets!

- Every once in awhile, amazing, complex and believable characters are born - Annie Shannon is one of those characters. Most women can relate to her on some level. A real woman with regrets, who doesn't have to be beautiful, rich or famous to be a central character in a book. I hope she will be a recurring character and that this wonderful new author will bring her back into our lives again and again. Stewart tells a gripping tale that hooked me from the first page to the very last. You get to know Stewart's characters so well that you visualize them clearly without having to be told what they're wearing that day or how they style their hair. She captures the essence of their personalities and makes them so believable that the reader buys into their motivations within the unfolding plot. The plot that unfolds is full of twists and turns keeping the reader guessing to the very last page. A remarkable accomplishment!!! highly recommend this new book - a compelling read. I hope we'll see much more from Barbara J. Stewart.
