- Why does it rank above Orwell's "1984" in importance? Well first of all, "It Can't Happen Here" predates 1984 by 13 years. Secondly, 1984 was written after WWII, while Lewis' book was written before it. That's a very important thing to try and keep in mind when you are reading this book. If you are successful in remembering that this book predates WWII, then it will absolutely blow your mind. You would have thought Sinclair Lewis lived through the Third Reich when really, in 1935, Hitler's government was still in a rather embryonic state.Lastly, Orwell wrote of "Big Brother," a fictitious an almost god-like sci-fi entity; Lewis wrote of "Corpos," a much more realistic and close-to-home horror. And if you don't know what he meant when he calls them "corpos" then you need to pay closer attention. Remember the old Mussolini quote, "Fascism is a collusion of CORPORATION and government"? Enough said.I'm not trying to take anything away from "1984," which was great; but this book by comparison receives almost no attention. It's not even really that easy to find in a store. Why was it so overlooked? The book is a little slow in places, and the writing is sometimes convoluted. Lewis is of an older generation than Orwell, and wrote in an older style which is a little dated today. But if you can get through the first half, the second half will give you nightmares.
