The book focuses on the modern understanding of human life-forms as constructs that followed an evolutionary history. The author thus finds science confronted with two questions: firstly, how the transgression of the virtual threshold between natural and cultural history was possible, secondly, how the socio-cultural constructs were able to develop in the course of history the way they did. The discussion concentrates on the problem of determining a processual logic in the development of societal structures as well as in the development of cognition. The focus of attention is the historico-genetic reconstruction of cognition. The book was originally published in German as »Historisch-genetische Theorie der Kultur« (Weilerswist 2000: Velbrück).

Genau wie politische Parteien müssen sich die Regierungen an die Anforderungen der digitalen Sphäre anpassen, da ihre Legitimität von ihrer Fähigkeit abhängt, Entscheidungen den Bürgern mitzuteilen. Trotz umfangreicher Untersuchungen darüber, wie das Internet die politische Kommunikation

verändert, ist wenig darüber bekannt, wie Regierungen digitale Technologie nutzen. Es gibt auch wenig Forschung darüber, wie unterschiedliche politische Systeme die Nutzung von Technologien beeinflussen. Daher untersucht diese vergleichende Studie wie Regierungsorganisationen in Deutschland und Großbritannien Webseiten und Social Media nutzen, um mit Bürgern und Medien zu interagieren. Der empirische Ansatz umfasst eine Inhaltsanalyse von Webseiten und Social Media sowie eine Social Network-Analyse von Twitter-Netzwerken. Die Ergebnisse zeigen, dass die Ministerien überwiegend Webseiten und Social Media für One-Way-Kommunikation nutzen und dass es eine zunehmende Personalisierung der Kommunikation gibt.

Communication, Consumerism, and Social Movements Routledge

This book offers a social theoretical analysis of imaginaries as constituent social forces of positive law and politics. Constitutional imaginaries invite constitutional and political theorists, philosophers and sociologists to rethink the concept of constitution as the normative legal limitation and control of

political power. They show that political constitutions include societal forces impossible to contain by legal norms and political institutions. The constitution of society as one polity defined by the unity of topos-ethnos-nomos, that is the unity of territory, people and their laws, informed the rise of modern nations and nationalisms as much as constitutional democratic statehood and its liberal and republican regimes. However, the imaginary of polity as one nation living on a given territory under the constitutional rule of law is challenged by the process of European integration and its imaginaries informed by transnational legal and societal pluralism, administrative governance, economic performativity and democratically mobilised polity. This book discusses the sociology of imagined communities and the philosophy of modern social imaginaries in the context of transnational European constitutionalism and its recent theories, most notably the theory of societal constitutions. It offers a new approach to the legal constitutions as societal power formations evolving at national, European and global levels. The book will be of interest to scholars and students interested in constitutional and European law theory and philosophy as much as interdisciplinary and socio-legal studies of transnational law and society.

On Communicating The Constitution of Society Outline of the Theory of Structuration

As a consequence of the rapid diffusion of online media, the conditions for political communication, and research concerning it have radically changed. Is empirical communication research capable of consistently describing and explaining the changes in political communication in the online world both from a theoretical and methodological perspective? In this book, Gerhard Vowe, Philipp Henn, and a group of leading international experts in the field of communication studies guide the reader through the complexities of political communication, and evaluate whether and to what extent existing theoretical approaches and research designs are relevant to the online world. In the first part of the book, nine chapters offer researchers the opportunity to test the basic assumptions of prominent theories in the field, to specify them in terms of the conditions of political communication in the online world and to modify them in view of the systematically gained experiences. The second methodological section tests the variations of content analysis, surveys, expert interviews and network analyses in an online environment and documents how successful these methods of empirical analysis

have proven to be in political communication. Written accessibly and contributing to key debates on political communication, this bookshelf essential presents an indispensable account of the necessary tools needed to allow researchers decide which approach and method is better suited to answer their online problem.
