## **REVIEW OF DEVELOPING**

## **INFORMATION SYSTEMS PRACTICAL GUIDANCE FOR IT PROFESSIONALS JULIAN COX**

- The success of this book seems to be based on its title rather than its content. Aside from being incredibly obsolete (first published in 1974 and never updated), the author was very selective in what cases to include for his "solution." Kusche is also without any real authoritative source material. Out of the 57 cases, he obtained only 6 accident reports. Most of his work is a debunk on popular claims on the Triangle. This led him in one case to "solve" a nonexistent flight (The B-29 in 1947 which was really a C-54 hundreds of miles away). Only about 7 or 8

incidents out of the 57 he lists are exposed as inaccurately listed as missing or being in the Triangle. Many of the most famous cases he cannot solve, and others are the victim of his shallow guesses. Most of his deductions are based on old newspaper accounts. Even these he agrees with in a pick and chose manner. In the case of the Cyclops, he even went to far as to write: "I confidently decided that the newspapers, the Navy, and all the ships at sea had been wrong, and that there had been a storm near Norfolk that day strong enough to sink the ship." His storm turns out to be fictional, as Gian Quasar was able to prove by referring his web site readers (URL) to the large amounts of documents on this ship kept in boxes 1068 to 1070 of the Modern

Military Branch of the National Archives. The recent increased sales of the book are no doubt due from the unprecedented interest documentary TV has displayed in Quasar's 12 years of research on the topic, as well as the high volume his web site receives (all major channels: History; Discovery; Travel; and TLC have done 1 or more 1 hour long shows based on Quasar's research). With his book coming out within a year, Kusche's old debunk will probably hit all time highs for a 30 year old book in reprint, but the reader will walk away disastified with Kusche's mediocre approach and bombastic claim to have solved it. Besides Quasar's upcoming book which is estimated to be adding more than 150 cases to the Triangle, there seems to be others in the works,

like by Bruce Gernon and Rob MacGregor (Indiana Jones fame). Triangle interest is going to be hot again, and there will probably be no room for long for a very 1974 debunk on the subject by an author who refused to travel there.

- As someone with a strong interest in the events of September 11, 2001, I wanted to learn more about the passengers and attacks. This book goes into great detail about the passengers on United Flight 93; their personal lives, interests, and their reasons for fighting back against the terrorists. I felt like I practically knew them after reading this book. There is one quote from passenger Deora Bodley that I felt like was well put and fitting for this type of novel: "People ask who, what, when, why, and how. I ask Peace." I admired people like Todd

Beamer and Tom Burnett Jr. for their decisive actions. You will learn more about the passengers, their families, and

the after-effects of their heroic actions as well as the other events that horrible day. Make this one a must-read. A true winner.
