## REVIEW OF THE EMPIRE OF MANUEL I KOMNENOS 1143 118

- Nelson Lee's straightforward account of his life as a Texas Ranger and then an Indian captive is enthralling. He also offers a valid critique of how the US govt was misguided in their approach to the Indian problem. Moreover, he pleads for the govt. to do something about those still in captivity. Fewer people might have gone West had they known what was really going on and the dangers ahead. This first-hand account is highly recommended.

- The book contains 280 pages of text, 25 pages of refernces, 7 pages of INDEX, and many figures and cartoon to explain the concept of author's hypothesis. Barbieri was a development biologist at MRC in Cambridge, NIH, and

Max Planck. This is a typical anti-Darwinism semi-pseudoscience book. I picked up the book because the book cover had a Chomsky's accolade. It's not as obvious and outrageous as Intelligent Design sort of book, but the author cites his own book to explain his main points.

Many biological facts in the book are real and correct, but there is no scientific logical structure to support the author's "semantic" theory. I was struck by the fact that this book was published from Cambridge University Press.
