## **REVIEW OF ORGANIZATIONAL BEHAVIOR SLOCUM HELLRIEGEL**

- The Book took on too many games to

provide any kind of useful information on how to play. It should be used more as an introduction to the various rules of the different styles of poker. Touched only briefly on the issues of starting hands and calling bets in each of the different games.

- The dialectic of Enlightenment is a history of false appearances. For Adorno & Horkheimer, trying to explain the world in its totality is equal to try to dominate it. Totality becomes totalitarianism. The authors present history as a tool of domination. Myth and reason both hide the deception of trying to make all things equal. By this logic -of identity/identification- everything is not, but must be the same. Knowledge is

mythical because it promises a happiness that can never be achieved in knowledge's terms. The central argument of this wonderful book is that myth is already enlightenment because it tries to explain the world and gain utility from it; and enlightenment is already myth for it tries to exclude anything that is different or contradicts Enlightened Reason. As Adorno & Horkheimer put it: "Enlightenment has a mythical horror to myth." Enlightenment obsessively tries to free itself from myth, but in doing so it becomes also mythical. This obsession takes the form of a saturating, technical rationality that ends in the horror of ethnic genocide. This is, as Habermas said, "the black book of Western philosophy."
