The CLEAR curriculum, developed by the University of Virginia's National Research Center on the Gifted and Talented, is an evidence-based

teaching model that emphasizes Challenge Leading to Engagement, Achievement, and Results. In Research and Rhetoric: Language Arts Units for Gifted Students in Grade 5, students will engage in a systematic study of rhetoric as contemplated by the Greek philosopher Aristotle. Students will answer the question: When do you appeal to one's intellect, to emotions, or perhaps to one's sense of morality when trying to persuade? In the research unit, students will learn and employ advanced research skills from crafting open-ended research questions and discerning between reliable sources. They will carry out their own research study and

present findings at a research gala. These units focus on critical literacy skills including reading diverse texts, understanding a speaker's or author's perspective, and understanding an audience's perspective. Winner of the 2016 NAGC Curriculum Studies Award Grade 5

How does mercury get out of the ground and into our food? Is tuna safe to eat? What was the Minamata Disaster? *Mercury Pollution: A Transdisciplinary Treatment* addresses these questions and more. The editors weave interdisciplinary threads into a tapestry that presents a more complete picture of the effects of mercury pollution and provides

new ways to think about the environment. The remarkable features that make mercury so useful—and poisonous—have given rise to many stories laid out in rich objective detail, carefully detailing medical, epidemiological, or historical insight, but sidestepping the human experience. A technically rich book that only touches on the human consequences of mercury poisoning cannot fully portray the anguish, confusion, and painful deaths that are the consequence of mercury pollution. Therefore, the editors purposely step out of the conventional scientific framework for discussing mercury pollution to explore the wider human

experience. This book clarifies how we are all connected to mercury, how we absorb it through the food we eat and the air we breathe, and how we release it as a consequence of our new technologies. It tackles interesting environmental issues without being overly technical and uses mercury as a case study and model for studying environmental problems. The book uses discussions of the issues surrounding mercury pollution to illustrate how an interdisciplinary vantage is necessary to solve environmental problems. Critical Reading Across the Curriculum,

Volume 1 Corwin Press

The Oxford Handbook of Carl Schmitt collects thirty original chapters on the diverse oeuvre of one of the most controversial thinkers of the twentieth century. Carl Schmitt (1888-1985) was a German theorist whose anti-liberalism continues to inspire scholars and practitioners on both the Left and the Right. Despite Schmitt's rabid anti-semitism and partisan legal practice in Nazi Germany, the appeal of his trenchant critiques of, among other things, aestheticism, representative democracy, and international law as well as of his theoretical justifications of dictatorship and rule by exception is

undiminished. Uniquely located at the intersection of law, the social sciences, and the humanities, this volume brings together sophisticated yet accessible interpretations of Schmitt's sprawling thought and complicated biography. The contributors hail from diverse disciplines, including art, law, literature, philosophy, political science, and history. In addition to opening up exciting new avenues of research, *The Oxford Handbook of Carl Schmitt* provides the intellectual foundations for an improved understanding of the political, legal, and cultural thought of this most infamous of German theorists. A substantial introduction places the

trinity of Schmitt's thought in a broad context.

Listening to Listeners
Prentice Hall

No matter where students' lives lead after graduation, one of the most essential tools we can teach them is how to comprehend, analyze, and respond to arguments. Students need to know how writers' and speakers' choices are shaped by elements of the

rhetorical situation, including audience, occasion, and purpose. In *Teaching Arguments: Rhetorical Comprehension, Critique, and Response*, Jennifer Fletcher provides teachers with engaging classroom activities, writing prompts, graphic organizers, and student samples to help students at all levels read, write, listen, speak, and think rhetorically. Fletcher believes that, with appropriate scaffolding and encouragement, all students can learn a rhetorical approach to argument and gain access to rigorous academic content. *Teaching Arguments* opens the door and helps them pay closer attention to the acts of meaning around them, to notice persuasive

strategies that might not be apparent at first glance. When we analyze and develop arguments, we have to consider more than just the printed words on the page. We have to evaluate multiple perspectives; the tension between belief and doubt; the interplay of reason, character, and emotion; the dynamics of occasion, audience, and purpose; and how our own identities shape what we read and write. Rhetoric teaches us how to do these things. Teaching Arguments will help students learn to move beyond a superficial response to texts so they can analyze and craft sophisticated, persuasive arguments—a major cornerstone for being not just college- and career-

ready but ready for the challenges of the world.

Many preachers long to understand the dynamics of thought, feeling, and behavior at work in congregations. They use many techniques to evaluate the needs of their congregation and to sharpen their sermons, but preachers seldom give members of their congregation the opportunities to identify qualities of preaching that motivate them to engage sermons, and qualities of sermons that prompt disengagement. This book draws on one of the first large scale

attempts in North America to do just that. Drawing on extensive interviews and analysis based on traditional rhetorical categories derived from Aristotle—the listener's perception of the character, personality and trustworthiness of the preacher (ethos), the appeals to reason in the content of the sermon (logos), and the role of feeling in the event of preaching (pathos)—the authors present case illustrations to help preachers listen pastorally to their own parishioners, to understand how their listeners' participation in the sermon is affected by the ethos, logos, and pathos, and how the pastor can use this understanding to preach in ways that engage listeners.

Pastors are encouraged to compare and contrast their own perceptions of preaching with those expressed by their parishioners and to reflect more broadly and deeply about preaching in the preacher's own congregational setting.

REVIEW OF ETHOS LOGOS PATHOS QUIZ NAME

- With a chapter covering a project or two in each flavor of medium, this book in a general sense yields what you need to build basic walkways, walls, patios. On repairs of existing structures I believe it to do a much better job. I've been looking for something more in depth on the subject of concrete (acid staining, texturing, etc) as an alternative to the standard tile or plain grey concrete. Unfortunately this book could not help me at all, they have one chapter devoted to

concrete and its far from inspirational. I'm not asking for the world here, but if someone is going to name a book "complete" and end up with something that's just barely enough, I have to give it a just passing grade. I recommend the following instead, especially since they are 1/2 the price but have better content: (Better Homes and Gardens) Step-By-Step Masonry and Concrete (Sunset) Complete Masonry: Building Techniques, Decorative Concrete, Tools and Materials *note: Sunset has several books on masonry, 3 of them are called "Complete Masonry", I've only had a chance to look at one of them. Also for inspiration and more in depth coverage of

concrete, check out "Concrete Countertops: Design, Form, and Finishes for the New Kitchen and Bath" it is excellent, but you will sort of need a basic book in addition to it.

- Anticipated this accounting of the Japanese in America at that time---had been touched by this treatment of them as I lived in Southern California at that time--preteen--- and experienced air raid sirens and search lights---as well as losing my best friend to

a concentration camp. The book is definitely an historical accounting of the affect on one family---but I found it overly descriptive in a repetitive style and lacking those stories---even little glimpses of those who did not own stores, or orchards or went on to higher education. Guess that is what I hoped it would be. My book club is discussing it tomorrow night at my home and several have echoed my thoughts---should be an interesting discussion.
