A Clash of Heroes--Brandeis, Weizmann, and American Zionism
Penguin

This is a story of the silent service—the submarine crews which destroyed the Japanese merchant marine. A narrative taut with drama, told with the intimacy of a confession, it deals with two strong-headed men: their loves, their jealousies, and their destinies in the lonely and desperate struggle between the hunter and the hunted. Few war novels will rival Run Silent, Run Deep in the naked realism of its action. None will surpass its rising excitement and brilliant descriptions of men in combat. Unlike many war novels, here is a story that deals with war from the perspective of command. Edward Beach re-creates with fidelity the anguish, agony, and triumphs of command decisions. In Commander Richardson, he has created a character who embodies all that is fine, all that is human, in an excellent naval officer. In a sense, Run Silent, Run Deep is a monument, not to the misfits and the mistakes, but to those men who rose to greatness under the sometimes unbearable tensions of action.

A Guided Tour Inside a Nuclear Warship Penguin

Here is the runaway bestseller that launched Tom Clancy's phenomenal career. A military thriller so gripping in its action and so convincing in its accuracy that the author was rumored to have been debriefed by the White House. Its theme: the greatest espionage coup in history. Its story: the chase for a top secret Russian missile sub. Lauded by the Washington Post as "breathlessly exciting," The Hunt for Red October remains a

masterpiece of military fiction by one of the world's most popular authors, a man whose shockingly realistic scenarios continue to hold us in thrall.

REVIEW OF HUNT RED OCTOBER TOM CLANCY POKEPARK

- As comparing with some other exam-oriented books for CFA and AICPA exam., it would be the most poor book I have read up to now. The book is poorly prepared and organized. While it is organized in according with the exam. structure, it is still difficult for the reader to follow. Most concepts have insufficient explanation. While some notations have not been clearly explained, some topics are explained (or jumped) very fast without proper elaboration. Some examples are even not supported by adequate reading before the examples and the explanation can only be found in the answers. Thus, it has made a chapter in pieces and then becomes difficult for the reader to memorize. I doubt why GARP recommend it to the candidates since 2000 and whether it is suitable and sufficient for exam. preparation purposes. I suggest some serious candidates may be required to refer to other textbooks and even myself has such planning.

- As someone who has watched with dismay as rich Yuppies searching for the ultimate 'edge' adventure have been allowed to buy their way into the "Everest experience", I was quite interested in this personal account by one such adventurer lucky enough to survive one of the most disastrous accidents on the mountain. Based on her narrative, my own conclusion was that most of them simply had no business being that high on a mountain like Everest where there is no room for error, no forgiveness shown, and no way out once things go awry. Still, this young woman is an interesting combination of gung-ho

enthusiasm and thoughtful consideration, although one wonders if she had a potential book deal in mind when she bought her way into the "adventure" in the first place. After all, there are a lot of sister women out there willing to buy into this pseudo-"bought and paid for adventure experience" nonsense. Of all things, this book reminds me of the recent pseudo-adventure memoir by Jon Katz, "Running To The Mountain". At least Jon had the sense to leave the crampons home and settle for a broken down cabin to repair in the Adirondacks. There seem to be two schools of thought in the reviews for this book. The first seems to be a single-minded endorsement of the experience full of the "yahoo!" Nike-like "just do it" credo that such hardy denizens of faux-macho tri-athletic events and celebrators of philosophies of personal punishment parading as self-discovery are wont to believe. I trust all of these ardent adventurers have never been to war, and come from backgrounds of affluence and comfort. The search for "edge experience" appear to be drowning in pools of pathetic self-absorption and petulant self-importance, as these otherwise safe and banal souls seem desperate for the ultimate experience like author Stephen Crane's fabled "Red Badge Of Courage". Why not just get somebody to take potshots at you? In this sense it seems more an expression of an immature inchoate longing for validation as a worthwhile adult than a native yearn for adventure. Of course, there are exceptions, and as far as I am concerned the author of the book may be one, given her own careful consideration of the risks and the care with which she approached the whole venture. The other predominant school of criticism seems to enthusiastically denigrate the way in which such foolhardy amateurs have deliberately endangered both themselves and their Expedition colleagues by venturing into realms they have no business climbing into. It isn't a coincidence that most of the people expressing these views seem to be both older and more experienced. Those of us who have been deliberately shot at by other human beings who meant us malice and harm rarely find a need to express our sense of adventure afterward. Life has already shown us that aspect of existence, and driving in traffic provides all of the elements of risk taking without any need to backpack into the rugged interior of Nepal. Still, as someone always fascinated by mountaineering and rock climbing, I hail those with the yearning and the willingness to experience their own innate curiosity by venturing up the slope and through the craggy precipices in search of whatever demons as propel them there. My real problem with the book is that like many other such well-organized contrived commercial pseudo-adventures, it allows the wealthy amateurs who can buy into the expedition to stand in the shadows of titans like Tenzing, Hilary, Mallory and Irving who sometimes struggled and even crawled toward the heights with their own hands and feet, often carrying their own provisions, quite unlike these pampered affluent "clients" who expect to be deferred to and helped by their "guides", and who seem to expect to be given the experience of reaching the pinnacle on the virtual backs of others because they have "paid for it". Such ideas and expectations not only vulgarize the quest for excellence into a craven management slogan but also give adventurers a bad name. In that sense, let the disaster on Everest give fair warning. When all else is said and done, man is still just an inconsequential visitor to the roof of the world, an intruder perilously perched on the quicksilver hope for good luck and good weather, and no one is safe if and when Mother Nature suddenly turns [ugly]. Enjoy!
