REVIEW OF PROCESS DESIGN OF SOLIDS HANDLING SYSTEMS PROJECT

- I really enjoyed the Giver. I think the author completely captured the reader. I felt the emotion that Jonas felt. Jonas had been deprived of feelings and color. We might wish for an 'equal' world, but this book changed my point of view on that subject. I think that this book must be read. It teaches so much. If you want a book with symbolism this is the book. Jonas is proving that things can be changed. I think that his attitude

in his life should be shared. This was an excellent book.

- This book has touched me deeply. The world that Jonas, an average 12 year old boy, is living in, is supposed to describe 'utopia.' However, Jonas is not a child anymore, and just like every 12 year old he gets to be assigned a job. In the big auditorium everyone is anxious, and excited. Suddenly big gasp fills the room as a mistake is noticed, the numbers went from 18 to 20. The elder has made a mistake. How can this be? At the end of the ceremony, the elder told everyone that the number "19" is very important. Jonas has been 'selected' to be the Receiver of memory, and the Giver is giving the memories to Jonas. This has Jonas frightened, because everyone heard that it is going to take physical pain for this job. However, Jonas is a brave heart, and didn't let this bug him. Unfortunately, other things have disturbed him greatly. Finding out how that is world isn't all that perfect, having to inject a deadly needle into your body so that you vanish from this black and white world. Not being able to have the freedom to love. Jonas and the Giver decide to do something about this, making a plan to seek their future, they go on a life to death adventure. Where in this world does their journey lead?
