REVIEW OF CCNA STUDY GUIDES

- I was looking for a piano songbook for children to play on a piano. I should have realized it was not just the songbook from the price. It comes with an electronic toy piano. The songbook is play by numbers and this did nothing for somebody that is learning to play piano. Very disappointing. Age level is pre-school, before able to read.
- The Foundation novels were a great pleasure to read, and I was surprised at the detail and intelligence Asimov puts into his books. Having written over 300 books of different genres, he is a scientific master at writing, and he is considered an above-all superior science fiction novelist of the 20th century. The Foundation novels, all works of art, are a nirvana in his ability.
