REVIEW OF EXTRAS UGLIES 4 SCOTT WESTERFELD

- In my humble opinion, I find it is ridiculous that eBooks cost more than books printed with ink and paper.
- Back in the year 1941, Mr. Bradbury started writing the story "The Fire Man": one nickel at a time in his local library basement. This story about burning books later transformed into what we know today as the classic Fahrenheit 451. This book is hailed as one of the best science fiction novels at the time, and is still very successful today. The book revolves around a character named Guy Montag, a fire fighter in an America where there is no

order, or self control: Books that contemplate deep thought are outlawed and burned, with no sense of literature or compassion towards those who hang on to them; as the pages burn at a cozy 451 degrees. This America, maybe even this world focuses more on fake joy and illusion, than pressing world issues, such as the constant threat of nuclear war. In this world, or at least in this America; the citizens are rampant, and are brainwashed to think that they are happy, when in fact each and every one of them are just drones without a real queen. More people are killed in random car accidents than their last nuclear war, which America won. Guy, like almost everyone else in the nameless city, gives in the misapprehension of happiness until he meets someone. One day he meets Clarisse Mc Cellan, a young teenager who changes his perspective on his life, and life in general; from the smallest rain drop to whether he really loves Mildred or not. He begins to realize the sheer grievance of the world; from thinking putting new blood in a person is curing them, to thinking T.V families are your real families. (This is Mildred's problem until the very end). He at last questions his own occupation, which is probably the reason why his life is the way it is. He finally goes off the deep end and steals a book from a lady who burns her and her books before the firemen do. It is then revealed to Mildred (and the readers) that Montag has been keeping a stash of books hidden for a year, and has been trying to memorize them. Alas, the information always slips away; like "the sieve and the sand." He then goes on a journey, both physically and mentally; as he must face himself, the Mechanical Hound, and even his own boss Captain. Beatty. He is very much Montag's opposite, and is the main antagonist. I would highly recommend this book to anyone who can create deep thought from reading a book. This book is action packed, epic, and is a striking realization on a path modern America might be heading for itself. The book itself is actually more relevant today than when it was first published in 1950. The fact is that the back story mentioned in the book on how America got this way is sounding more and more like our present. Basically, their past might be our definitive future. This book is classic for a reason, as the book is critically acclaimed by almost any person who reads it; of any demographic. The only real requirement is to be able to analyze the information in the book, as there are a few moments of symbolism in the book. Overall, I believe that there are a lot of bone- rattling moments that anyone with a brain should enjoy, but probably won't in the end. And for anyone who likes this book, I recommend The Martian Chronicles, and Dandelion Wine." They are excellent examples of Bradbury's work. I also recommend The Last Book in the Universe; it is very similar to Fahrenheit 451 in plot. In all, I would give 5/5 to the classic that made us all think a little more.. --Christian C.
