So what are you awaiting? Begin checking out *Principles Of Accounting 11th Edition* Needles Powers Crosson recaps today and find your following wonderful read!

## **REVIEW OF PRINCIPLES OF ACCOUNTING 11TH EDITION**

## NEEDLES POWERS CROSSON

- This book is beautifully illustrated, and it explains the facts of life and death in a very direct and unsentimental way: all creatures have a lifetime, then they die. The book discusses the lifetimes of different living creatures, from insects who only live a few days, to large mammals who live many years. It describes people as living for "sixty or seventy years, sometimes even more." That is a little scary for a child whose grandparents are already way past those ages and still in great health. "Lifetimes" explains the concepts of lifespan and death, but does not offer

comfort for those who fear death or are grieving. I recommend the book "Gentle Willow" for those who want a gentler, more comforting story, that is no less true to fact.

- I have done a lot of research on diabetes at the library and on the internet after I was diagnosed Type 2 in Aug 2007. I saw the dietician/nutritionist recommended by my doctor and also read a ton of information on the internet and many books from the local library. My fasting blood sugar when I was diagnosed was 311. I was able to get it down to 110 - 120 level after dieting, exercising, and eating the things recommended by the dietician. My problem was my levels were erratic up and down even when eating the

same diet. I saw Dr. Bernstein's book was highly recommended by Amazon readers, so I took the chance and bought the book. After reading that a diet of high proteins and very, very low carbs would help stabilize my blood sugars, I decided to try it. To my amazement, I started getting readings in the mid 80's and the levels stopped spiking up and down. Carbs were my problem. Dr. Bernstein recommends an ideal reading of 83 and that is now my target. This book should be a must read for all diabetics, both Type 1 and Type 2 people. My motto is "you can die from diabetes or learn to

live with it," and I chose to learn to live with it. This book is a great learning tool and coupled with exercise (including weight training), weight loss and proper diet, you can control what happens to your body. It worked for me with results immediately. Highly, highly recommended. If you have a friend or relative with diabetes, BUY this book for them. The author (Dr. Bernstein) is still a practicing physician specializing in diabetes treatment. He is also a Type 1 diabetic. Dr. Bernstein's experiences lead to this book being published. It should be required reading for all diabetics.
