## REVIEW OF HANDBOOK OF COSMETICS AND PERSONAL CARE ADDITIVES AN

• Drucker shares so much knowledge about the early to mid 20th century global economic situation. He predicts the coming era of information technology. He suggests our advanced economies must shift to depend on knowledge work rather than industrial might. He explains why barriers to trade must fall in order for the most productive companies/countries to thrive. The Government's role diminishes as multinational corporations grow. Isolationism and protectionism hurt an economy in the long run. There are great concepts explained in this book, but it is like drinking from a fire hose. I needed to go through it twice, and will probably make a third attempt in the next few years.

- this is an absolute MUST READ for really anyone out there. the principal of the book being of use in one's own private life as well as when coming up with business strategies and trying to evaluate impact on existing ones. never out of time, for sure an lesson best learned!
