REVIEW OF INTRODUCTION TO SOLIDS BY LEONID V AZAROFF

- Have you ever paid the price for being a little too nice? "The King's Chessboard" was about a

proud king in Deccan, India who paid the price for rewarding a wise man that didn't want to be rewarded. The King asked the wise man what would his reward be. The wise man said serving the King was his reward, but the King insisted on rewarding the servant. So, the wise man asked for one grain of rice. Then, each day for 64 days the wise man would receive twice as much than the day before for each square on his chessboard. Things soon got out of hand because they were now giving the wise man tons of rice. By the end of the period they would have given out 274,877,906,944 tons of rice. The King had to stop the wise man from receiving these huge amounts of rice. In the end, the king would learn how easy it is for pride to make a fool of someone, even a king.

- I picked this book up on a whim, thinking I would learn something more about the region that's been so much in the news lately. It isn't really that kind of book; after all, the Middle East conflict is thousands of years old. Instead, I found a jewel of a novel. In some ways it reminds me of Demetria Martinez's MotherTongue, the poetry in the language -- it's also better, with a strong story line, characters that won't let you go, that are as real as your next door neighbor, even though they're not of my culture. I think I do understand Palestinians better, and it's hard to believe the author isn't Palestinian herself. Whether you pick it up on a whim, or on purpose, you won't put Staircase of a Thousand Steps down.
