Masterful 2D and 3D head, neck, and brain dissections provide unsurpassed insights into head, neck, and brain anatomy An internationally renowned and beloved author, educator, brain anatomist, and neurosurgeon, Professor Albert Rhoton has a special place in medical history. He was revered by

students and colleagues and is regarded as one of the fathers of modern microscopic neurosurgery. A driving principle in his anatomy lab was the simple phrase, "Every Second." This was embraced in his philosophy that every second of every day, a patient's life was improved by a surgeon assisted by the anatomic knowledge his lab helped elucidate and distribute. Rhoton's Atlas of Head, Neck, and Brain is the visually exquisite crowning achievement of Dr. Rhoton's brilliant career and unwavering dedication to the intertwined pursuits of surgical anatomy and neurosurgery. The atlas reflects the unparalleled contributions Dr. Rhoton made to the contemporary understanding of neurosurgical anatomy. Dr. Peris-Celda, with the collaboration of an impressive

cadre of international multidisciplinary experts, worked closely under Dr. Rhoton's tutelage on this project. This book is the culmination of 5 years of work and experience gleaned from more than 40 years of surgical anatomy research and exquisite dissection techniques performed in Dr. Rhoton's laboratory. Special Features Each anatomic dissection meticulously labeled with English and Latin descriptors for easy cross referencing with other resources. Multiple views of the most complex regions of the head, neck, and brain provide a deeper understanding of anatomy. More than 600 anatomical images systematically organized in four major sections: Osteology of the Head and Neck; Face and Neck; Ear, Nose, Pharynx, Larynx, and Orbit; and

Neuroanatomy and Cranial Base. Superb 2D images presented in a large printed format to optimize the viewing experience. 3D digital images fully realize the beauty of the dissections and enhance the learning process. Specimens injected with colored silicone provide better visualization of arteries and veins. Breathtakingly stunning, this atlas is certain to be a treasured reference for medical students, residents, and clinicians specializing in neurosurgery, facial plastic surgery, otolaryngology, maxillofacial surgery, and craniofacial surgery for many years to come.

The horizons of sophisticated imaging have expanded with the use of combined

positron emission tomography (PET) and computed tomography (CT). PET-CT has revolutionized medical imaging by adding anatomic localization to functional imaging, thus providing physicians with information that is vital for the accurate diagnosis and treatment of pathologies. Since the integration of PET and CT several years ago, PET/CT procedures are now routine at leading medical centers throughout the world. This has increased the importance of nuclear medicine physicians acquiring a broad knowledge in sectional anatomy for image interpretation. The Atlas of Sectional Radiological Anatomy for PET/CT is a user-friendly guide presenting high-resolution, full-color images of anatomical detail and focuses solely on normal FDG distribution

throughout the head & neck, thorax, abdomen, and pelvis, the primary sites for cancer detection and treatment through PET/CT.

## **REVIEW OF POCKET ATLAS OF SECTIONAL ANATOMY VOL 1 COMPUTED TOMOGRAPHY AND MAGNETIC RESONANCE IMAGING**

- "The Ministry of Fear," (1943) is a British spy story/crime drama/thriller by much honored twentieth century British author/screen writer Graham Greene (The Third Man, The end of the affair). The book is set in England, a country violently at war during World War II. Arthur Rowe is released back into wartime England after serving two years in a mental asylum for the mercy killing of his terminally ill wife. Despite the attention given him by psychiatric

professionals, he is still rather immature and self-centered. Somehow, at a local garden fete, he stumbles across a murderous Nazi spy ring, by correctly guessing the weight of a cake - made with real eggs, we are repeatedly told. As Rowe appears to be substantially friendless, he doesn't know where to turn; but stakes his survival on that well-known British ability to muddle through. First he consults Mr. Rennet at "Orthotex: Long Established Private Inquiry Bureau" that generally does divorce work. Then, in his shambling way, Rowe finds himself at the offices of Comforts of the Free Mothers, where he meets a brother/sister pair of Austrian refugees, Anna and Willie Hilfe. And at Mrs. Bellairs' fortune telling séance, where he meets a Dr. Forester, and a

man going by the names of Cost/ Travers or Ford; and foul deeds are afoot. Mr. Rennet, of Orthotex, the employee Rennet assigns to Rowe's case, Mr. Jones, and most everyone else Rowe meets, as he tries to sort things out, will most likely regret having met Rowe. The book, as many of Greene's other works, was made into a film of the same title *MINISTRY OF FEAR*, starring Ray Milland, directed by the great cinematic thriller-maker, the Austrian-born Fritz Lang (*METROPOLIS*). The film may now be better known than the novel it's based on: at any rate the talented Lang made some canny changes, such as setting the introductory garden fair in the still-charming countryside, rather than the war torn Russell Square, Bloomsbury, London, rather close to the

British Museum, as Greene did. Still, it must be said, Greene gives us a first-rate view of London under bombardment, its shelters and smoking ruins. (Lang made his film, supposedly set in the U.K., in Hollywood, to escape the dangers and privations of the city at that time.) Graham Greene (1904-1991) was one of the most illustrious British writers of the 20th century. He enjoyed a very long life, most of the century, and a very long, prolific writing career, during which he gave us *The Power and the Glory* (Penguin Classics), and *Our Man in Havana* (Penguin Classics). These two books, among Greene's many other masterworks, were made into notable films. His books were very well-written, highly literate; greatly honored; much praised by the critics, and enjoyed a

wide readership, being frequent best sellers. The author had first-hand spy experience; he was recruited to Britain's secret service, and worked in the African country of Sierra Leone during the Second World War. The writer was also one of the better-known Catholic converts of his time; many of his thrillers, as this one, deal with Catholic themes of guilt and redemption. He created vivid characters with internal lives; they faced struggles and doubt.

Sometimes his characters despaired, or suffered world-weary cynicism - they were always self-aware. But Greene always created a tight thriller, in a lean, realistic style that boasted almost cinematic visuals. If you've never read him before, the book at hand is relatively light and cheerful compared to some of his others: it's a good place to start.

- I liked this book a lot. It's good to have if you're interested in aromatherapy.
