## **REVIEW OF SOLUTION MANUAL SEARS AND SALINGER THERMODYNAMICS**

- I just returned from a summer working as a camp counselor, and I'd heard great things from my campers about Eragon so I decided to give it a shot. Fantasy is one of my favorite genres (lots of McCaffrey and Tolkein) so I had high hopes despite the fact

that I had actually not purchased the book earlier because the jacket design looked rather childish. I had no idea until halfway through the book that Christopher Paolini started writing Eragon at 15. I discovered this, however, because I had gotten frustrated with the writing and needed to take a break, so I read the author bio in the back. He was 15 and boy does it show. If I had to describe the book in three words they would be repetitive, derivative, and undeveloped. Repetitive- How many times can this flipping kid Eragon fight someone, pass out, and wake up safe and sound in a warm bed soon after? It happened so many times in the book I

literally threw it on the floor in disgust at one point. It was like playing an RPG! Derivative- I know Paolini probably couldn't help himself and didn't know he was doing it but he has blatantly copied storylines and lore from some of the best authors in the business. Though having grown up with McCaffrey and Tolkein it can be hard to imagine the realm of fantasy in any terms other than their own. The relationship of men and dragons is straight McCaffrey, I am absolutely certain that the third book will contain a "Luke, I am your father" moment with Eragon and Galbatorix, and the Kull are so derivative of Tolkein's Uruk-hai I have actually called

them that while discussing the book with my father. Underdeveloped - Good lord. The writing. The characters are so undeveloped, and until about halfway through the book (when I suspect his mother began helping him) Paolini showed absolutely no inclination to include scene-setting details or incidents that don't advance the plot but do flesh out the story. He just goes from fight to fight to fight, with nobody having truly compelling reasons for anything they do. What is worse is that he is not very good at describing the fights themselves, so they all run together. His foreshadowing is glaringly obvious (I use Brom's true occupation and the uses of the

really big slide to illustrate this). He fails to evoke empathy for his characters, and he even wrote in a mommy and daddy to usher Eragon through the story (Saphira and Brom). The first half of the story, before the dramatic shift in writing style (but unfortunately not plot development) reads like a story my brother wrote about a spy when he was in 7th grade. Incidentally, given the colors of the gemstones he named in his description of Tronjheim, the city-mountain sounds exceptionally ugly. He also failed to create a nuanced, compelling kingdom or distinct races. All the names across every race sound similar, different races' languages all sound the same...the

only difference is their physical descriptions. All this being said, I do not think he is a bad writer. I think he is merely inexperienced. It is obvious from his writing that Paolini did not spend much time out of his bedroom as a child, so he has very little by way of experience to bring to his novel. His characters are so pitifully developed because he really only has the emotions and responses he has observed in himself and his parents to draw from. I think with a little time and a lot more real-world experience he could be an excellent fantasy writer. I wouldn't recommend this book to a discerning fantasy reader, it is my Dad's opinion that at the ripe

old age of 20 I could write something better, but for a younger boy it would be just the thing.

- Eragon is totally cool. I couldn't put the book down, it was so good. I liked it because it was really fast-paced, but it concentrated on the

important things as well. It was really suspenseful too, so if yo're a person who likes adventure and suspense, as well as fast-paced action and mythology, then this book is for you. GO CHRISTOPHER!
