## **REVIEW OF MODEL S TESLA**

- As Jack tells us in his writing journal on the first day of his class' poetry unit: "I don't want to/because boys/don't write poetry./Girls do./I tried./Can't do it./Brain's empty." But as hard as he resists the idea, poetry begins to seep into that empty brain. At first the works his teacher, Miss Stretchberry, introduces make little sense to him. "Why doesn't the person

just/keep going if he's got/so many miles to go/before he sleeps?" Eventually, the poetry seductively captures him, and he writes about William Blake's, The Tiger: "I am sorry to say/I did not really understand/the tiger tiger burning bright poem/but at least it sounded good/in my ears./Some of the tiger sounds/are still in my ears/like drums/beat-beat-beating." When Miss Stretchberry reads Walter Dean Myers', Love That Boy, it all comes together, and Jack is finally hooked, "I copied that BEST poem/and hung it on my/bedroom wall/right over my bed/where I can/see it when I'm/lying/down." As the story continues, he begins to open up, write his own verse, and with the guidance

of his teacher and inspiration of his new favorite poet, finally puts down on paper the poem that's been inside of him all along just waiting to come out; the story of his beloved dog, Sky, who was hit by a car..... Newberry Award Winner, Sharon Creech, has outdone herself with this marvelously sensitive, sometimes poignant, often amusing little masterpiece. Her simple text, told in free verse, and written in the voice of a ten or eleven year old, explores the power of words, their rhythm, and energy, how they can inspire, captivate, and elicit feelings. Young and old, alike will be entranced as they begin this wonderful journey with Jack on his lifelong

adventure with the love of words. Ms Creech has included the poems used by Miss Stretchberry at the end of the book, and this is a good starting point for young poetry lovers. Perfect for kids 9-12, Love That Dog is a treasure to be read and shared by everyone.

- Ubelaker's text has incredibly detailed descriptions of archaeological sites to accompany the wonderfully graphic sketches and photographs. This book allows neophytes and experts to enjoy and appreciate the study of human skeletal remains. I especially like his explanations of cultural manipulation of the dentition. Perfect for students of science, crime buffs and people who are interested in

what clues we leave behind in our bones.
